I 、Letter to Shareholders

1 、OPERATING RESULTS OF 2024:

In retrospect, the global economic landscape in 2024 remained complex and volatile. As countries continued to adjust their economic policies in the post-pandemic era, unresolved geopolitical tensions—such as the Russia-Ukraine war, conflicts in the Middle East, and cross-strait tensions—along with ongoing confrontations between Western countries and Russia and China, and a rise in protectionism, all exerted negative pressure on economic development. Fortunately, global inflation control efforts showed results, prompting the U.S. Federal Reserve to cut interest rates three times after September 2024 to stimulate the economy. Driven by the robust growth of the AI technology industry, the global economic growth rate reached 3.2%, outperforming the previous year. However, traditional industries unrelated to electronic technology, including our company, continued to face significant threats due to sluggish market demand.

In 2024, the Company recorded an operating revenue of approximately NT\$550 million, with a pre-tax loss of around NT\$73 million. Earnings per share after tax stood at (NT\$0.67), indicating that the operational challenges faced in 2023 have yet to be resolved. Faced with the critical warning sign of two consecutive years of losses, the Company continues to enhance both the breadth and depth of its composite material R&D, focusing on high-value-added new materials and single-material formulations to attract clients from the electronics and technology sectors. The Company also prioritizes the issue of environmentally friendly materials and recycling. In addition, it is actively promoting strategic alliances with equipment and mold manufacturers to strengthen opportunities for securing new orders, striving to fully achieve the operational targets set for 2025.

Here is the business performance report in 2024:

I. Business Plan Implimentation and The Results:

Unit: NTD thousand

Item	2024	2023	Amount of Increase (Decrease)	Percent Change
Net Operating Revenue	553,239	594,313	(41,074)	(6.91)
Operating Cost	494,676	526,748	(32,072)	(6.08)
Net Gross Profit	58,563	67,565	(9,002)	(13.32)
Operating Expense	141,937	129,663	12,274	9.47

Item	2024	2023	Amount of Increase (Decrease)	Percent Change
Operating Income	(83,374)	(62,098)	(21,276)	(34.26)
Net Non-operating Income	10,084	(8,154)	18,238	223.67
Profit before income tax	(73,290)	(70,252)	(3,038)	(4.32)

II. Budget Implementation

Unit: NTD thousand

Item	Actual number	Budget number	Achievement
Net Operating Revenue	553,239	1,054,555	52.46
Operating Cost	494,676	874,704	56.55
Net Gross Profit	58,563	179,851	32.56
Operating Expense	141,937	143,937	98.61
Operating Income	(83,374)	35,914	(232.15)
Net Non-operating Income	10,084	(8,902)	113.28
Profit before income tax	(73,290)	27,012	(271.32)

III. Financial performance and profitability analysis

Item		2024	2023
Financial Structure(%)	Debt to asset ratio	35.70	43.98
	Long-term Capital Ratio	148.06	157.63
Liquidity (%)	Current ratio	119.97	134.52
	Quick ratio	63.41	67.30
	Times interest earned	(4.19)	(2.45)
Profitability(%)	Return on Total Assets	(4.07)	(3.28)
	Return on Equity	(8.00)	(8.21)
	Net Profit Margin	(13.26)	(11.76)
	Earnings Per Share	(0.67)	(0.75)

IV. Research and development situation

(1) Equipment injection

Our company engages in equipment injection molding across various fields, including functional shoe outsoles, midsoles, decorative accessories, uppers, and industrial products. Among these, upper injection molding—primarily for OEM leisure footwear for the CROCS brand—is currently the company’s main line of business. Every year, we continuously develop new products for major brand clients. In 2024, models that have entered mass production include: TG24470 and TG24471 heel counters, TG24865 heel supports, TG24866 decorative shoe parts, and TG24867 midsole support plates for the 361° brand; and TG23830 slipper uppers for the CROCS brand.

Ongoing development projects expected to enter mass production in 2025 (Year 114) include: TG24841 toe puffs, TG24842 decorative shoe parts, and TG24846 mid-waist plates for the NIKE brand; TG24879 football outsoles and TG24474 midsole heel counters for the KAPPA brand; TG24477 midsoles for the Track Smith brand; and TG24478 eyelets, TG25410 heel counters, and TG25411, TG25412, TG25413 decorative shoe parts for the 361° brand.

Our R&D team has long collaborated with internationally renowned brands, continuously advancing our production, sales, and research capabilities. We have built strong trust with our clients and remain committed to expanding our market presence in the industry.

(2) Compound material

For over 40 years, our company’s compound materials division has established its presence in the industry through research and development. We have set up a "Green Polymer Materials R&D Center" to advance material research and meet the needs of clients across various industries. We specialize in customized formulation and modification of engineering plastics such as PA, PP, PC, ABS, PBT, TPU, and PLA to fulfill diverse product requirements.

Our clientele spans multiple sectors, including automotive and motorcycle, 3C electronics, agricultural machinery, furniture, and consumer goods—building a strong and long-standing professional reputation. In recent years, our R&D team has continued to focus on the development of high-value materials while also addressing global environmental goals such as plastic reduction and carbon neutrality. We are actively exploring the modification of PCR (Post-Consumer Recycled) plastics and are moving toward mono-material formulations to enhance recyclability. Our goal is to provide both domestic and international clients with the most competitive, high-quality product solutions and services.

2、BUSINESS PLAN FOR 2024

2.1. Operation strategy and policy

1. Rapidly follow the changes and respond to corporate risk.
2. Implement KPI management and pursue the achievement of the goal.
3. Expand local service and global arrangement.
4. Elaborate research and development technology and enhance competitiveness.
5. Develop a diverse market and solid industry foundation.
6. Insist on prioritize quality to ensure client satisfaction.
7. Emphasize ESG issue to promote sustainable development.

2.2 Forecast sales volume and its basis

Based on the global economic outlook, domestic and international industry trends, customer demand forecasts, and the company's production and sales resource allocation both at home and abroad, and with reference to recent changes in the company's business scale and the progress of new product development, the sales forecast for each business division in 2025 has been established. The annual total revenue target is approximately NT\$800 million, representing a 44.92% increase compared to the actual performance of the previous year. Details are shown in the table below:

Unit: NTD thousand

Office	2025 Sales Goal	2024 Sales Goal	Estimated growth rate(%)
Equipment business department	250,043	100,831	147.98
Compound business department	551,716	452,408	21.95
Total	801,759	553,239	44.92

2.3 Important policy of production and marketing

1. Equipment business department
 - (1) Strengthen existing international cooperative brands and continuously expand the new collaborations with shoe industries.
 - (2) Expand our customer base in non-footwear injection products and deeply. cultivate diverse local business opportunities.
 - (3) Enhance the autonomy of brand collaboration development by establishing. mold factories.
 - (4) Impletment production 10 days in advance to ensure delivery deadline and. service quality.
 - (5) To establish the capabilities to support with production and continuously. strengthen personal rotation training.

2. Compound material business department

- (1) Continue the development and application of eco-friendly recycled materials to seize global opportunities in plastic reduction and net-zero carbon emissions.
- (2) Enhance the applicability and cost control of high-value, high-specification materials to improve product competitiveness.
- (3) Focus on developing single-material formulations to facilitate recycling and reuse, thereby strengthening the company's advantages.
- (4) Expand into the field of circular economy materials and accelerate the development of the recycled fabric hot-press board market.
- (5) Prioritize quality and ensure the security of payment transactions to reinforce customer trust.

3 、 FUTURE STRATEGY.

- (1) Leverage the regional economic advantages of the group's enterprises with flexible procurement policies and production-sales coordination to strengthen the global layout.
- (2) Seize opportunities from global plastic reduction and restriction trends by focusing on the development of various eco-friendly and bio-based material markets.
- (3) Prioritize long-term cooperation with major clients to enhance the company's industry position and competitive edge.
- (4) Pursue collaborations across upstream and downstream industries, as well as cross-industry partnerships, to introduce new industrial developments and expand the company's profitability in depth and breadth.
- (5) In response to global net-zero carbon initiatives, emphasize carbon credit-related issues and implement ESG sustainability development in line with national policies.

4 、 INFLUENCE OF EXTERNAL COMPETITIVE ENVIRONMENT ,ENVIRONMENTAL REGULATION AND OVERALL MANAGEMENT ENVIRONMENT

Outlook for the Global Economy in 2025, although inflation is under control, the rise of protectionism and resulting tariff wars may hinder a rapid recovery in end-user consumption. Geopolitical tensions remain frequent, and global economic growth is expected to remain flat. The Company operates production bases in Taiwan, Vietnam, and Mainland China. In adherence to laws and lawful business practices, we continuously monitor the latest regulations and economic developments in each region. Rapid response mechanisms are in place to ensure timely discussions and decisions within relevant departments. When necessary, expert consultation is sought to formulate effective strategies in response to environmental changes, minimizing any potential impact or disruption to the Company's operations.

5 、 CONCLUSION

Pontex operates with a global layout through its three major operational bases in Taiwan, China, and Vietnam. With over 40 years of accumulated professional expertise, we are committed to business growth by continuously expanding into new industries, developing new customer markets, and enhancing corporate value and client trust.

Pontex management team has always upheld the mission of maximizing shareholder equity and employee well-being. The overall business performance in 2024 fell short of expectations, marking a second consecutive year of losses. The management team fully acknowledges its responsibility and is addressing the situation with utmost seriousness.

We sincerely ask all shareholders for continued support. The management team is actively working to improve corporate competitiveness and secure new orders and partnerships. The entire company is making every effort to meet shareholder expectations and to restore profitability and corporate vitality at the earliest possible time.

Wish you good health and good luck

SHEN,MAO-KEN
Chairman.

Note 1: Corporate shareholders should have the name of corporate shareholders and representative illustrated separately (the name of the corporate shareholders should be noted) also, Table 1 should be filled out.

Note 2: Please list the actual age, and it may be listed in ranges, such as 41–50 years old or 51–60 years old.

Note 3: Indicate the date of the first-time elected director or supervisor; also, the period of interruption should be noted.

Note 4: Previous work experiences relating to their current roles; if the person works in the auditor's firm or in an affiliated company during the aforementioned time period, the job title and responsibilities must be provided.

Note 5: Where the chairperson of the board of directors and the general manager or person of an equivalent post (the highest level manager) of a company are the same person, spouses, or relatives within the first degree of kinship, an explanation shall be given of the reason for, reasonableness, necessity thereof, and the measures adopted in response thereto.

5-1 The chairman of the company serves as the general manager simultaneously, therefore, the chairman could have more information to understand operating conditions. The board of directors could grasp more operating conditions. Because of the flat organization, which elevates management efficiency and makes the execution more smoothly.

5-2 More than half of the company's directors are not employees or managers. Aside from strengthening the supervision and balancing mechanism, it could also reduce the concentration of power caused by the chairman who also is the general manager, resulting in a loss of objectivity and supervision.

(2)-4 、 Board diversity and independence:

- (1) Diversity of the board of directors: The members of the board of directors have. currently met the requirements for diversity. However, to meet the needs of future development, the Company will continue to review the composition elements of diversity and strengthen the goal of the diversity of the board of directors members during re-election. The Company's concrete management goals are to gradually increase the number of board of directors members with cognition and background in corporate governance, environmental sustainability, corporate social responsibility, and law, to better supervise and guide the Company in response to international development trends.
- (2) Independence of the board of directors: The company's board of directors is. composed of 10 directors, including 3 independent directors. The number of independent directors accounts for 30% of all directors, and no more than two directors have a relationship with the spouse or second degree of kinship. Furthermore, there are no cases as stipulated in Article 26-3, Paragraphs 3 and 4 of the Securities and Exchange Act. The primary responsibility of the Company's board of directors is to supervise the company's compliance with the law, finance transparency, timely disclosure of important information, and the ability to make objective and independent judgments on the company's financial business. Therefore, the Company has met the requirements of the law when the election.

- Note 1: Professional qualifications and experience: separately state the professional. qualifications and experience of each director and supervisor. If they are members of the audit committee and with accounting or financial expertise, should describe their accounting or financial background and work experience. Furthermore, illustrate whether there is none of the behaviors listed in Article 30 of the Company Act.
- Note 2: The independent directors should state the correspondence of independence, including but not limited to whether the self, spouse, and second degree of kinship serve as the directors, supervisors or employees of the Company or its affiliated companies; The number of shares and proportion of the self, spouse, and second degree of kinship' (or in the name of others). Whether serving as the director, supervisor or employee of a company with a specific relationship with the company (refer to Article 3, Paragraph 1, Subparagraph 5 ~ 8 of the Regulations Governing Appointment of Independent Directors and Compliance Matters for Public Companies). The amount of remuneration received from providing such business, legal, financial, and accounting services to the company or its affiliated companies in the last 2 years.
- Note 3: For the method of disclosure, please refer to the best practice reference. examples on the website of the Corporate Governance Center of the Taiwan Stock Exchange.

Note 1: The information of the general manager, vice general managers, senior managers, and managers of departments or branches should be included positions. equivalent to the general manager, vice general manager, or senior managers should also be included regardless of the title.

Note 2: The experience related to the current position, such as having worked in an accounting firm or an affiliated corporate during the period disclosure before, the title and position in charge should be stated.

Note 3: Where the chairman of the board of directors and the president or person of an equivalent post (the highest level manager) of a company are the same person, spouses, or relatives within the first degree of kinship, the reason for, reasonableness, necessity thereof, and the measures adopted in response thereto (such as increasing the number of independent director seats, and more than half of all directors must not concurrently serve as employees or managers) must be disclosed:

- (1) The chairman of the company serves as the general manager simultaneously, therefore, the chairman could have more information to understand. operating. conditions. The board of directors could grasp more operating conditions. Because of the flat organization, which elevates management efficiency and makes the execution more smoothly.
- (2) More than half of the company's directors are not employees or managers. Aside from strengthening the supervision and balancing mechanism, it could also. reduce the concentration of power caused by the chairman who also is the general manager, resulting in a loss of objectivity and supervision.

2、Remuneration of Directors, Supervisors, General Manager and Vice General Manager, etc.:

(1) Remuneration to directors and independent directors (A company that has posted after-tax deficits within the three most recent fiscal years shall disclose the name and remuneration paid to directors.)

1. Please state the policy, system, standards and structure of independent directors' remuneration payment, and describe the relevance of responsibilities, risks, time invested and other factors to amount of remuneration: The remuneration of the directors of the Company is paid by the board of directors by the authorization of the Articles of Incorporation, according to the direct participation in the company's operations and contribution, and taking domestic and foreign industry standards into consideration. When the company is profitable, the board of directors approve the distribution of directors' remuneration and employee's compensation by the Articles of Incorporation. Independent directors are the members of the Audit Committee. In addition to remuneration paid to directors, considering the responsibilities, risks, and investment time, different reasonable remunerations are determined.

2. In addition to the table disclosure above, the other remuneration to the directors of the Company in the last year from all companies in financial reports (such as to be a consultant, not an employee): None

(2) Remuneration to directors and independent directors (A company that has posted after-tax deficits within the three most recent fiscal years shall disclose the name of directors according to the remuneration range.)

Note 1: List the names of the directors separately (for institutional shareholders, list the names of the institutional shareholders and the representatives separately), as well as the directors and independent directors, and disclose all payments in summary. If a director also holds the position of general manager or vice general manager, fill in this table and table (1) below, or tables (2), and (3) below.

Note 2: The remuneration to the directors in the most recent year (including salaries, professional allowances, severance payment, different types of bonuses, and gratuities).

Note 3: Fill in the the amount of remuneration paid to the directors passed by the board of directors in the most recent year.

Note 4: The director's related business implementation expense in the most recent year (including travel expenses, special allowance, allowances, and providing such as dormitory and vehicle). If providing a house, vehicle or other transportation vehicle or specific expense occurred, should disclose the character and cost of the assets, an actual amount or rent estimated at fair value, fuel and other payments. If a driver is assigned, specify the compensation of the driver by the Company but not included it as a part of the remuneration.

Note 5: The payment to directors who also performed as employees (including holding the position as general manager, vice general. manager, other managers, and employee), including salaries, professional allowances, severance payment, different types of bonuses, gratuities, traveling expense, special allowance, allowances, and providing such as dormitory and vehicle. If providing a house, vehicle or other transportation vehicle or specific expense occurred, should disclose the character and cost of the assets, an actual amount or rent estimated at fair value, fuel and other payments. If a driver is assigned, specify the compensation of the driver by the Company but not included it as a part of the remuneration. Furthermore, the salary recognized under IFRS 2 "Share-Based Payment", the acquisition of share subscription warrants, restricted stock for employees, and the subscription of new shares in a cash capital increase, should be included as remuneration.

Note 6: If the directors also performed as employees (including holding the position as general manager, vice general manager, other. managers, and employee) and received compensation as employees (including stock and cash), disclose the amount of remuneration to employee passed by the board of directors on 10 March 2022. If the estimation is not possible, calculate the amount planned to pay in the current period on the basis of the actual amount paid in the previous year, and fill in Table 1-(3).

Note 7: Disclose the total amount of payment of all companies (including the Company) included in the consolidated financial. statements to the directors of the Company.

Note 8: Disclose the names of the directors in the respective bracket of the payment scale by the total amount of payment from the. Company.

Note 9: Disclose the total of all itemized payments from all companies (including the Company) included in the consolidated financial. statements to each director of the Company and disclose the names of the directors in respective brackets of the payment scale.

Note 10: Net income refers to the net income of the previous period in the most recent year's individual or separate financial report .

Note 11:

- a. Put down the amount of remuneration from direct investee companies other than the subsidiaries or the parent company to. the. directors of the Company (If there is no payment, put down "None").

b. If the directors have received payment from direct investee companies other than the subsidiaries or the parent company, include. this amount in Column I of the payment scale, and change the name in the column and name as “parent company and all direct investee companies”

c. Remuneration refers to the reward, payment (including payment to employees, directors, and supervisors) and performing. professional duties to directors who also act in the capacity of directors, supervisors or managers in the direct investee companies other than the subsidiaries or in the parent company.

* The content of remuneration disclosed in this table is different from the purpose of taxation. This table is just for the disclosure of information only, not as a reference for taxation.

- Note 1: The term “Top Five Highest-Paid Executives” refers to the company's managerial personnel. The definition of “managerial personnel” shall follow the standards set forth in the letter No. 0920001301 dated March 27, 2003, issued by the former Securities and Futures Commission of the Ministry of Finance. The identification of the “Top Five Highest-Paid” is based on the total compensation received by managerial personnel from all entities included in the consolidated financial statements. This includes salaries, retirement and pension payments, bonuses, and special allowances, as well as employee remuneration (i.e., the sum of A + B + C + D). The individuals with the five highest totals are then identified. If a director concurrently serves as one of the aforementioned executives, they must be listed in both this table and the previous one (Item (1)(1)).
- Note 2: This refers to the salaries, position allowances, and severance payments received by the top five highest-paid executives in the most recent fiscal year.
- Note 3: Put down different types of bonuses, gratuities, traveling subsidies, special expense accounts, allowances, and payment in kind including accommodation and company vehicle for the top five highest paid executives in the previous period. If housing, company car or other transportation vehicle or exclusive expense is incurred, disclose the nature and cost of the assets, the actual amount of rent or estimated at fair value, fuel payment and other payment. If a driver is assigned, specify the remuneration to the driver by the Company but not included it as a part of the remuneration. Salary expense recognized under IFRS 2 “Share-Based Payment”, including the acquisition of ESO, RSU/RSA, and subscription of new shares for raising capital, which should be included as remuneration.
- Note 4: Put down the amount of remuneration to the top five highest paid executives as employees (including stock and cash) passed by the Board in the most recent year. If the estimation is not possible, calculate the amount in proportion to the actual payment of the previous year, and fill in Table 1-(3).
- Note 5: Disclose the total payment from all companies included in the financial statements (including the Company) to the top five highest paid executives of the Company.
- Note 6: Net income refers to the net income of the previous period. If IFRS has been adopted in reporting, net income shall be referred to as the net income as presented in the separate financial statement covering the previous period.
- Note 7:
- a. Put down the amount of related payment to the top five highest paid executives from all direct investee companies other than the subsidiaries or the

parent company (If there is no payment, put down “None”).

b. Remuneration includes the reward and wages (including payment to employees, directors and supervisors) and professional allowances to the top five highest paid executives of the Company from direct investee companies other than the subsidiaries or the parent company in the capacity of directors, supervisors or managers of these companies.

* The remuneration disclosed in the table is different from income as defined in the Income Tax Act. This table is therefore provided for disclosure only and is not used for taxation purposes

(4) Name of the managers received employee remuneration and distribution of remuneration : The company doesn’t distribute employee remuneration.

(5) Separately Compare and explain the total amount of remuneration paid to the company's directors, supervisors, general managers and vice general managers, etc. in the last two years by the Company and all companies in the consolidated financial statement, the analysis of the proportion of after-tax net profit in parent company only or individual financial reports, and explain the relationship between business performance and future risks and the policy, standard and composition of paying remuneration, the procedure of determining remuneration.

1. The ratio of the remuneration to net income paid to directors, supervisors, general manager and vice general manager

Item Title	Ratio of total remuneration to net income			
	2024		2023	
	The company	Companies in the consolidated financial statements	The company	Companies in the consolidated financial statements
Director	-6.87%	-9.33%	-8.03%	-10.62%
Supervisor	0.00%	0.00%	0.00%	0.00%
General manager and	-7.57%	-7.97%	-9.12%	-9.86%

vice general manager				
Total	-14.44%	-17.30%	-17.15%	-20.48%

2. The policy and standard of paying remuneration, the procedure of combining and determining remuneration, and the relationship between business performance.

- (1) The remuneration of directors and supervisors of the company is divided into two items: the remuneration of directors and supervisors for receiving travel allowance when attending the joint meeting of directors and supervisors and profit distribution. If there is profit in the current year and the profit before tax per share exceeds NT\$1, no more than 8% will be distributed as remuneration for directors and supervisors under the articles of incorporation. The specific amount authorized by the remuneration committee shall be based on the resolutions following articles of incorporation, submitted to the board of directors for approval, and it is then submitted to the shareholders' meeting for report.
- (2) The remuneration paid by the company to the general manager and vice general manager is handled by the company's personnel related regulations, and the payment is made after considering the annual performance assessment results of each person and the achievement of responsibility goals and other quantitative indicators.
- (3) Relevance of business performance: The manager's remuneration is determined by the company's personnel management regulations.
- (4) Relevance of future risks: If there is any surplus in the company's overall performance, it will be distributed according to the company's articles of incorporation, so that there will be no risk to the future.

To sum up, the company's policy of paying directors, supervisors, general manager and vice general manager remuneration and the procedure for setting remuneration have a positive correlation with business performance, and there is no factor to guide relevant personnel to increase the company's risk in pursuit of remuneration. Therefore, future risks should be limited.

3、OPERATIONS OF THE BOARD OF DIRECTORS:

The term of the 14th Board of Directors is from 2022.06.02 to 2025.06.02

In Fiscal Year 2024 and up to the date of this annual report's publication, the Board of Directors convened 8 meetings in total, with 6 held in 2024.

The attendance record of each director is summarized as follows:

Title	Name (Note1)	Attendance in person(B)	By Proxy	Attendance rate (%) (B/A)(Note2)	Remarks
Chairman	Henry Global Investment Co.,Ltd. Representative:Mr. Shen,Mao-Ken	8	0	100.00%	Reelection and reappointment on 2022.06.02
Director	Teng Tsai investment Co.,Ltd. Representative: Xiong,Di-Jun	8	0	100.00%	Reelection and reappointment on 2022.06.02
Director	Jung-Shiung Investment Co.,Ltd.	8	0	100.00%	Reelection and reappointment on 2022.06.02 (Director assigned the appointment)

	<p>14. Proposal to appoint Cushman & Wakefield Property Advisors Ltd. (Taiwan Branch) to handle the sale of the Company's real estate assets located at the Taichung Tanzi headquarters, for approval.</p>	<p>(1) Based on the appraisal report, the unit price appears to be undervalued, resulting in a lower overall valuation. It is recommended that the minimum bidding price be set higher.</p> <p>(2) It is</p>	As the Audit Committee did not reach a resolution of approval for this proposal, and the number of votes in favor did not meet the special resolution requirement of two-thirds of all directors (i.e., 8 votes), the proposal was not approved.	

		recommended to engage a third appraisal firm for an additional valuation.	
	15. Proposal for the Company to invest in and acquire 100% equity interest in CHISYU COMPANY LIMITED., in order to obtain the leasehold rights (right-of-use asset) to a parcel of land located in the Tanzi Juxing Industrial Park, Taichung City (leased from Taiwan Sugar Corporation), for the purpose of constructing a new plant for the Company. This proposal is submitted for resolution.	(1) It is not appropriate for the Company to obtain the land use rights of the Taiwan Sugar Corporation property by acquiring the equity of another company. (2) Based on the financial statements of CHISYU COMPANY LIMITED, the proposed valuation appears to be excessively high and unreasonable.	As the Audit Committee did not reach a resolution of approval for this proposal, and the number of votes in favor did not meet the special resolution requirement of two-thirds of all directors (i.e., 8 votes), the proposal was not approved.
2025.04.23 14th Session, No. 17	1. Proposal to approve the list of nominated candidates for directors to be submitted at the Company's 2025 Annual General Shareholders' Meeting (AGM) for discussion. 2. Report on the status of the private placement of common shares approved at the 2023 Shareholders' Meeting, including fund utilization, project execution progress, and effectiveness. 3. Proposal to approve the release of non-competition restrictions for newly elected directors.	Without objection or reservation.	None, all directors who attended agreed the proposal.

(2) In addition to the above matters, other matters involving objections or expressed reservations by independent directors that were recorded or stated in writing that requires a resolution by the board of directors: None °

I · Implementation of Board Members' Abstention from Voting on Related Party Matters: For each case, the names of the board members, the content of the proposal, the reason for the conflict of interest, and the participation in the voting process should be stated.

April 23, 2025, 14th Board Meeting, 17th Session:

Agenda Item 3: Proposal to lift the non-compete restrictions for newly appointed directors, submitted for discussion.

Resolution: The board members involved in the conflict of interest, namely Huang, Qiwen, Director (Representative

of HOUNDEY ENTERPRISE CO., LTD.), Xu, Yinzhu, Director, Chen Zongyi, Director, and Lin Zhihong, Director, abstained from the vote due to their conflict of interest. After consulting with the remaining attending directors, the proposal was passed as presented.

Not providing business, legal, financial, accounting for the company or related companies in the last two years for the received amount of remuneration.	None

Note 1: Specify the years of seniority of related work, professional designation and experience, and the status of independence of the members of the remuneration committee. For independent directors, refer to P.23, Appendix I, profiles of directors and supervisors (I) content as stated in the remark column. Put down the director, independent director, or others for identity (specify if the person is the convener).

Note 2: Professional designation and experience: specify the professional designation and experience of individual members of the remuneration committee.

Note 3: Status of independence: specify the status of independence of the members of the remuneration committee, including but not limited to holding a position as director, supervisor or employee of the Company and its affiliates by the person, spouse, kindred within the 2nd tier. Quantity and proportion of Company shares held by the person, spouse, and kindred within the 2nd tier (or in the name of a third party), holding a position as Director, Supervisor or employee of companies in a special relationship with the Company (refer to Subparagraphs 5~8 of Paragraph 1 under Article 6 of the Regulations Governing the Appointment and Exercise of Powers by The Remuneration Committee of a Company Whose Stock is Listed on Taiwan StockExchange or Taipei Exchange), the amount of remuneration for rendering services in commerce, legal affairs, finance, and accounting to the Company or its affiliates in the last 2 years.

Note 4: For information on the means of disclosure, refer to the sample version of the best practice principles posted on the website of the Corporate Governance Center of Taiwan Stock Exchange.

1.5.2 Operations of remuneration committee

- (1) There are 3 members of the remuneration committee.
- (2) The term of office for current members runs from June 2, 2022 through June 1, 2025. A total of 2 (A) Remuneration Committee meetings were held in the previous period. The qualification and attendance record of the Remuneration Committee members was as follows:

Title	Name	Attendance in person (B)	By Proxy	Attendance (%)(B/A) (Note)	Remarks
Converner	Shen,Xiu-Xiong	3	0	100%	Re-election (2022.06.02 reelection)
Committee Member	Xu,Ji-Shan	3	0	100%	(New on 2023.11.09)
Committee Member	Wu,Sheng-Min	3	0	100%	Re-election (2022.06.02 reelection)

Responsibilities of the remuneration committee:

- (1) Set up and regularly review the company's directors, supervisors, and managers' annual and long-term performance goals and salary policies, systems, standards, and structures.
- (2) Regularly evaluate the achievement of the performance goals of the company's directors, supervisors, and managers, and determine the content and amount of their salaries. When performing the responsibilities in the preceding paragraph, the committee shall follow the following principles:

- (1) Ensure the Company's salary arrangements comply with relevant laws and are sufficient to attract outstanding talents.
- (2) The performance evaluation and remuneration of directors, supervisors, and managers should refer to the normal level of payment in the industry, and consider the time dedicated by the individual, the responsibilities are undertaken, the achievement of personal goals, the performance of other positions, and the remuneration company paid for same position recent years. Additionally, via the achievement of the company's short-term and long-term business goals, the company's financial status, etc., to evaluate the reasonable relevance between individual performance and the company's operating performance and future risks.
- (3) Directors and managers should not be guided to engage in behaviors that exceed the company's risk appetite in pursuit of salary.
- (4) The proportion of distributing dividends for the short-term performance of Directors and senior managers and the partial variable remuneration should be determined by considering the characteristics of the industry and the nature of the company's business.
- (5) Members of the committee are not allowed to participate in discussions and vote on their salary decisions.

The proposals and results of the meeting and the company's handling of members' opinions			
Date and Term	Proposal details and follow-ups	Resolution	The Company's Handling of Members' Opinions
August 8, 2024 5th Session, No.4	1. Amendment to Chapter 19 "Regulations for the Management of Overseas Personnel," Article 15 "Leave" and Section 15.2 "Home Leave to Taiwan" of the Company's Personnel Management Rules, with additional provisions proposed for approval.	The proposal has been approved as there were no objections from the remuneration committee members after consulted by the chairperson	None
November 7, 2024 5th Session, No.5	1. Review and approval of the 2024 year-end bonus proposal for managerial officers and red envelope proposal for directors.		
March 6, 2025 5th Session, No.6	1. Amendment to Article 15 "Leave" and Sub-article 15.2 "Home Leave to Taiwan" under Chapter 19 "Regulations for Expatriate Personnel" of the Company's Personnel Management Rules – addition of new provisions.		

Other disclosures:

1. If the board of directors does not adopt or amend the suggestions of the remuneration committee, it shall state the date, term, proposal content, resolution results of the board of directors and the Company's response to the remuneration committee (such as the remuneration approved by the Board of Directors is better than the suggestions of the remuneration committee, should explain the discrepancy and its reasons): None.

2. Should a committee member oppose or retain their opinion regarding any decision made by the remuneration committee and their opinion has been recorded or submitted in a written statement, the committee meeting date, session, content of the resolution, opinions of all members, and the response to the opinions shall be recorded: None.

Note:

(1) If a specific member is elected to resign within the fiscal year, put down the date of relief from office in the remark column. The actual attendance (as observer) rate (%) will be calculated on the basis of the actual frequency of attendance (as observer) to the session of the remuneration committee and the frequency of the convention of the remuneration committee while the director is still in office.

(2) If an election of directors has been held to fill the vacancy before the end of the fiscal year, put down the names of the newly elected members and the members of the previous term, and noted as new to the office or reelected to office and the date of the election. The actual attendance (as observer) rate (%) will be calculated basis of the actual frequency of attendance (as observer) to the session of the remuneration committee and the frequency of the convention of the remuneration committee while the member is still in office.

1.5.3 Promotion of sustainable Development Implementation Status

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
1. Has the Company established a governance structure for promoting sustainable development, including the designation of a dedicated (or concurrent) unit responsible for sustainability efforts, authorized by the Board of Directors and overseen by senior management, with supervision by the Board?		V	<p>1. The Company currently assigns the Office of the President to oversee sustainability-related matters based on identified sustainability issues, coordinating relevant departments within the existing organizational structure. A dedicated sustainability unit has not yet been established.</p> <p>2. The Company has consistently promoted sustainable development and business continuity. Monthly company-wide meetings are held via video conferencing, connecting the Taiwan headquarters, the Qingyuan plant in Guangdong, China, and the Binh Duong plant in Vietnam. These meetings are used to identify sustainability issues relevant to business operations and stakeholder interests, develop and implement annual plans, and track execution outcomes to ensure sustainability strategies are fully integrated into day-to-day operations.</p>	None

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			3. In every Board meeting, the highest-ranking business executive reports on the Company's current operational status, sustainability development, and business strategies. The Board of Directors and Supervisors provide guidance and oversight on strategic direction and implementation.	
2. Does the company conduct risk assessments on Environmental, Social, and Governance (ESG) issues related to its operations based on the principle of materiality, and has it formulated corresponding risk management policies or strategies?(NOTE 2)	V		Although the company has not yet established a formal risk management policy, we remain diligent in minimizing and preventing negative impacts on environmental protection and occupational safety and health. In alignment with global environmental and occupational health and safety trends, the company has implemented the ISO 14001 management system. Additionally, the company has adopted procedures such as the "Material Information Handling and Insider Trading Prevention Procedures" and "Internal Control Self-Assessment Procedures and Methods." Through the ongoing operation of various management systems and procedures, the company is able to identify and respond to risks related to operations, including those	None

			<p>concerning the environment, employee safety, customers, suppliers, and other stakeholders.</p> <p>The company convenes meetings as necessary, during which department heads conduct risk assessments and identify potential risk factors. Internal and external communications are then carried out as needed to address and mitigate those risks.</p> <p>(1) Environmental Aspects:</p> <p>(a) In accordance with ISO 14001 requirements, the company conducts annual risk identification and formulates response measures through its "Environmental Considerations Auditing and Operating Procedures," ensuring the effective operation of the environmental, safety, and health (ESH) system.</p> <p>(b) We have developed various management methods to reduce waste, emissions, and pollution risks, and actively prevent environmental pollution.</p>	

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			<p>(c) The company implements waste sorting to reduce waste and considers minimal waste and recyclability during product development.</p> <p>(2) Social Aspects:</p> <p>(a) The company conducts annual information security training for all employees to enhance awareness and prevent data breaches involving the company and its clients.</p> <p>(b) Critical internal websites and application systems are isolated from the public internet via firewalls to improve cybersecurity and prevent malicious attacks; regular disaster recovery drills for information systems are also conducted.</p> <p>(c) Quarterly meetings are held with the Employee Welfare Committee, Labor-Management Committee, and Occupational Safety Committee to communicate with employees. Legal updates are provided in a timely manner to prevent labor disputes. Employees may submit suggestions through meetings or suggestion boxes, fostering harmonious labor relations.</p>	

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			<p>(d) Measures in line with ISO 14001 standards are implemented to reduce pandemic-related risks.</p> <p>(3) Governance Aspects:</p> <p>(a) Various management measures are in place. Safety personnel conduct audits on safety practices across departments and propose improvements to ensure a safe and healthy work environment. Regular fire drills and occupational safety training are conducted to strengthen emergency response and self-management capabilities.</p> <p>(b) In response to major infectious disease outbreaks:</p> <p>i. The company follows external guidelines such as "Business Continuity Guidelines for Major Epidemics," "Employer Guidelines for Hiring Migrant Workers During Epidemics," and "Migrant Worker Management Measures," adjusting internal controls dynamically based on public updates.</p> <p>ii. Employees are encouraged to get vaccinated. Executives and directors reduce external participation in corporate governance training and instead attend virtual sessions to maintain governance education.</p>	

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			<p>iii. Employee travel and large gatherings are temporarily suspended.</p> <p>(c) Each department conducts an annual self-assessment of internal controls to review the effectiveness of the previous year's internal control implementation and legal compliance.</p> <p>(d) To adapt to industrial and business changes—including technological shifts, lack of innovation, and changes in business models—the company takes the following actions:</p> <p>i. Holds regular internal meetings to exchange and discuss market information.</p> <p>ii. Provides regular product development progress reports.</p> <p>iii. Clearly defines and reports on specifications, costs, and market expectations for new product projects.</p>	

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			(e) In accordance with IATF 16949 strategies and risk management protocols, the company ensures that relevant operations are carried out effectively.	
3. Environmental Issues (1) Does the company establish proper environmental management systems based on the characteristics of their industries?	V		All factories of the company follow ISO14001 to establish an environmental management system and continue to pass third-party verification. TUV SUD verified the factory in 2023 years and issued an ISO 14001 quality certificate. The validity period is from 21 February 2024 to 20 February 2027. The Company implements wastewater treatment, noise prevention, waste recycling, and toxic substance treatment following the environmental safety management system and environmental protection laws and regulations, uploads data to the "Environmental Protection Administration Industrial Waste Report and Management System" and "Toxic and Concerned Chemical Substances Registration and Declaration System" monthly to declare relevant report data.	None
(2) Does the company endeavor to utilize all resources more efficiently and use renewable materials which have a low impact on the environment?	V		The Company continues to strive for elevating the utilization efficiency of various resources. For instance, instead of providing paper cups, employees	None

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			need to prepare drinking cups by themselves, and employees are asked to bring their tableware. Copy paper, envelopes, and paper bags are reused as official document delivery bags. Waste bags used in on-site operations are also recycled into garbage bags. The raw materials used by the company comply with the RoHS and REACH regulations of the European Union. The production unit actively handles the recycling of materials and reduces the pollution during the manufacturing process to decrease the impact on the environment.	
(3) Does the company evaluate the potential risks and opportunities in climate change with regard to the present and future of its business, and take appropriate action to counter climate change issues?	V		Because the Company is engaged in plastic products and compound materials, it places great importance on issues related to climate change. It requires employees to start from daily life. For example, document printing should take duplex printing, recycle and reuse. A recycling box is set up next to the photocopier for recycling paper. The Company uses electronic invoices and encourages employees to transmit official documents or letters electronically. It also reduces printed faxes and directly transmits as files, which greatly reduces	None

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			<p>paper consumption. In addition, the temperature of the airconditioner in the office is set at 28 degrees in summer, and energy-saving LED T5 lamps are used for lighting. Employees respond to the company's policy to form a good habit of turning off lights and saving energy, in order to slow down global warming.</p> <p>Current related measures are as follows: (1) The water tank has been established to reuse the water from the chiller, and there is no deviation. (2) The wastewater used in factory production has been installed with treatment equipment and is repeatedly used in production-related operations, and there is no deviation. (3) The manufacturing process switches to more water-saving and power-saving equipment, and there is no deviation.</p>	
(4) Does the company take inventory of its greenhouse gas emissions, water consumption, and the total weight of waste in the last two years, and implement policies on energy efficiency and carbon dioxide reduction, greenhouse gas reduction, water reduction, or waste management?	V		The waste in the company's factory is only general industrial waste, and no toxic waste is produced. All waste is sorted at the source for waste reduction. Resources are sorted and recycled before being placed in garbage trucks. The waste is also processed	None

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			<p>by the contents approved in the industrial waste cleanup plan and is transported to qualified incinerators for incineration according to law.</p> <p>The Company's manufacturing process is extrusion shaping. The air pollutants produced are mostly particulate matter pollution and volatile organic compound material. Therefore, the Company has installed 3 sets of air pollution prevention equipment and 2 sets of washing tower equipment in the factory, so that the waste gas and volatile organic compound material emission from the factory could be effectively treated to ensure compliance with regulatory requirements. The Company's wastewater during the manufacturing process is recycled and reused. There is wastewater treatment equipment in the factory, which can recycle and reuse the manufacturing process wastewater to reduce water consumption and achieve energy-saving effects.</p> <p>According to the schedule stipulated by the Financial Supervisory Commission, planning and guidance for greenhouse gas inventory and other related operations have been conducted.</p>	

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
4. Social Issues (1) Does the company formulate appropriate management policies and procedures according to relevant regulations and the International Bill of Human Rights?	V		The Company recognizes and voluntarily abides by internationally recognized human rights standards such as the "Universal Declaration of Human Rights", "The United Nations Global Compact", "United Nations Guiding Principles on Business and Human Rights" "International Labour Organization", and respects the protection regulated in Bill of Human Rights. Following relevant labor laws, Bill of Human Rights, and Occupational Safety and Health Act, the Company has established "Regulations of Appointment Management", "Work Regulation", "Regulations of Sexual Harassment Complaint and Tackling", "Regulations of Employee Complaint Management", and "Regulations of Workplace Violence Behavior Complaint and Tackling", etc., and announced and posted on the company's website to protect the rights and interests of employees and to protect the health and safety of employees.	None

			convenient daily needs for the employees. In the aspect of caring for the physical and mental health of the employees, the company arranged annual health checks. The doctors and nurses come to the factory to provide employees with stress relief and health care. In addition, an exercise space is set up, with fitness equipment and table tennis tables. Therefore, the employees could do exercise to relieve stress and achieve sports effects after work.	
(3) Does the company provide a healthy and safe working environment and organize training on health and safety for its employees on a regular basis?	V		Employees are the most important assets of a company. Providing a comfortable and safe working environment is the company's commitment and the basic guarantee for employees. Therefore, establishing a good working environment to ensure the workplace safety of employees is the primary responsibility of every company. The Company emphasizes the safety and health of employees, from the physical examination of new employees, regular health checks of employees, maintenance of mechanical equipment, safety signs of mechanical equipment (Chinese and Vietnamese versions), use of personal protective equipment, training and on-the-job training of on-	None

			<p>experience will also be tracked and given individual health consultation, care, and guidance as necessary. Since 2022, on-site medical care has been implemented, and professional healthcare personnel comes to the company every month. The professional doctor is arranged to provide on-site services at least once a year so that colleagues can grasp their health conditions.</p> <p>The total number of occupational accidents in 2023 was 0, in addition to continuous advocacy for prevention policies, and give proposing prevention policies, the on-site supervisor will also use the morning meeting to publicize the safety of the operation and correct the unsafe operation and behavior of the employees.</p> <p>The certificates currently obtained by the company include ISO9001, ISO14001, IATF16949, Global Recycled Standard (GRS), Post-Consumer Recycled resin (PCR), etc.</p>	
(4) Does the company provide its employees with career development and training sessions?	V		The Company has formulated the "Regulations of Education and Training Management" to plan integrated competency training for officers and colleagues at all levels, including orientation,	None

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
			professional training, officer training, etc., to help colleagues continue to learn and grow through diverse learning methods. According to the training plan or demand requested by officers, the company arranged for related personnel to participate in external professional training courses to cultivate the key professional capacities of colleagues. A total of 142 people participated in the training in 2024, and the subsidiary in China has a total of 21 personnel. During the regular performance interview every year, the officer discusses with the employees and sets up an annual personal capacity development plan. Through regular inspection and feedback, the company assists the employees with building the best career capacity development plan.	
(5) Does the company's products and services comply with relevant laws and international standards in relation to customer health and safety, customer privacy, and marketing and labeling of products and services, and are relevant consumer protection and grievance procedure policies implemented?	V		The company has set up a business email for clients and an extension of business department service. The service includes customer complaints, dispute resolution, and the post-service mechanism. Customer data is managed as confidential files by Personal Data Protection Act. Non-related personnel is not allowed to view it. The	None

	Y E S	N O	Abstract explanation	
5. Does the company reference internationally accepted reporting standards or guidelines, and prepare reports that disclose non-financial information of the company, such as corporate social responsibility reports? Do the reports above obtain assurance from a third party verification unit?		V	The Company, with a paid-in capital of less than NT\$2 billion, has not yet prepared a sustainability report. In accordance with regulations, the Company will prepare the 2024 sustainability report in 2025 and submit it after obtaining third-party assurance. The Company adheres to the principles and guidelines of the "Corporate Sustainability Best Practice Principles for TWSE/TPEX Listed Companies" in implementing corporate governance, promoting environmental sustainability, and fulfilling social responsibility.	None
The Company has formulated the company's "Sustainable Development Best Practice Principles " based on the "Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies", and it was approved by the board of directors on 10 March 2022. At present, it is still handled by the above-mentioned rules and the relevant regulations of the Taipei Exchange, and there is not much difference in the current operation.				
<p>7. Other important information to facilitate a better understanding of the company's implementation of sustainable development:</p> <p>(a) Human Rights: The company has always paid attention to human rights and cared for the disadvantaged in society. Since 1994, the company has continuously hired physically challenged indigenous peoples. Currently, the company employs 1 physically challenged and 2 indigenous people, all of which are higher than government regulations. Additionally, a more appropriate job is arranged for the person to meet his physical conditions.</p> <p>(b) Energy conservation: The company cooperates with laws and government energy conservation and carbon emission reduction policies. In addition to strengthening the promotion of energy conservation, the company also installs energy-saving and water-saving tools to improve the company's internal electricity and water equipment, such as adopting energy-saving lamps and automatic water-saving valves, etc., and designating</p>				

Evaluation item	Implementation status (Note 1)			Deviations from the "Sustainable Development Best Practice Principles of TWSE/TPEX listed Companies" and Reasons
	Y E S	N O	Abstract explanation	
a specific person to be responsible for water and electricity switches and control.				
(c)Environmental Protection: The company actively invests in the development and production of eco-friendly products, such as eco-friendly biodegradable plastics, non-halogen flame retardant plastic materials, and eco-friendly recycled compound materials that meet US regulations. Additionally, the company implements environmental protection measures such as resource classification and recycling throughout the company. The current implementation has good effects.				
(d) Community Participation: The company is enthusiastically involved in the improvement of the community, such as assisting in the completion of the widening project of the external roads of Longxing Lane where the community is located, which has achieved good results in facilitating the entry and exit of vehicles and people in the community. Furthermore, donate funds and sponsor gifts to the Community Development Association to promote rural regeneration activities, and assist in the promotion of the Civil Defense of the Neighborhood Watches to ensure a safer and more comfortable living environment in the community. Additionally, the company holds community environment cleanup and hiking and mountain cleanup activities from time to time to maintain a clean and tidy community environment.				
(e) Social Welfare: Actively participate in the activities of public interest groups that care for the physically and mentally challenged, and recruit volunteers to actively engage in charity activities.				
(f) Safety and Health: The company pays attention to the safety and health of the factory, including setting up management personnel for labor safety and fire, and regularly promoting and organizing fire prevention and disaster prevention drills. Additionally, the company strives to improve factory safety protection measures and pollution prevention to prevent labor and factory safety incidents.				

Note 1: If "Yes" is checked under implementation, please describe the key policies, strategies, measures and results adopted. If "No". is checked under implementation, please give reasons and describe relevant strategies and measures to be adopted in the future.

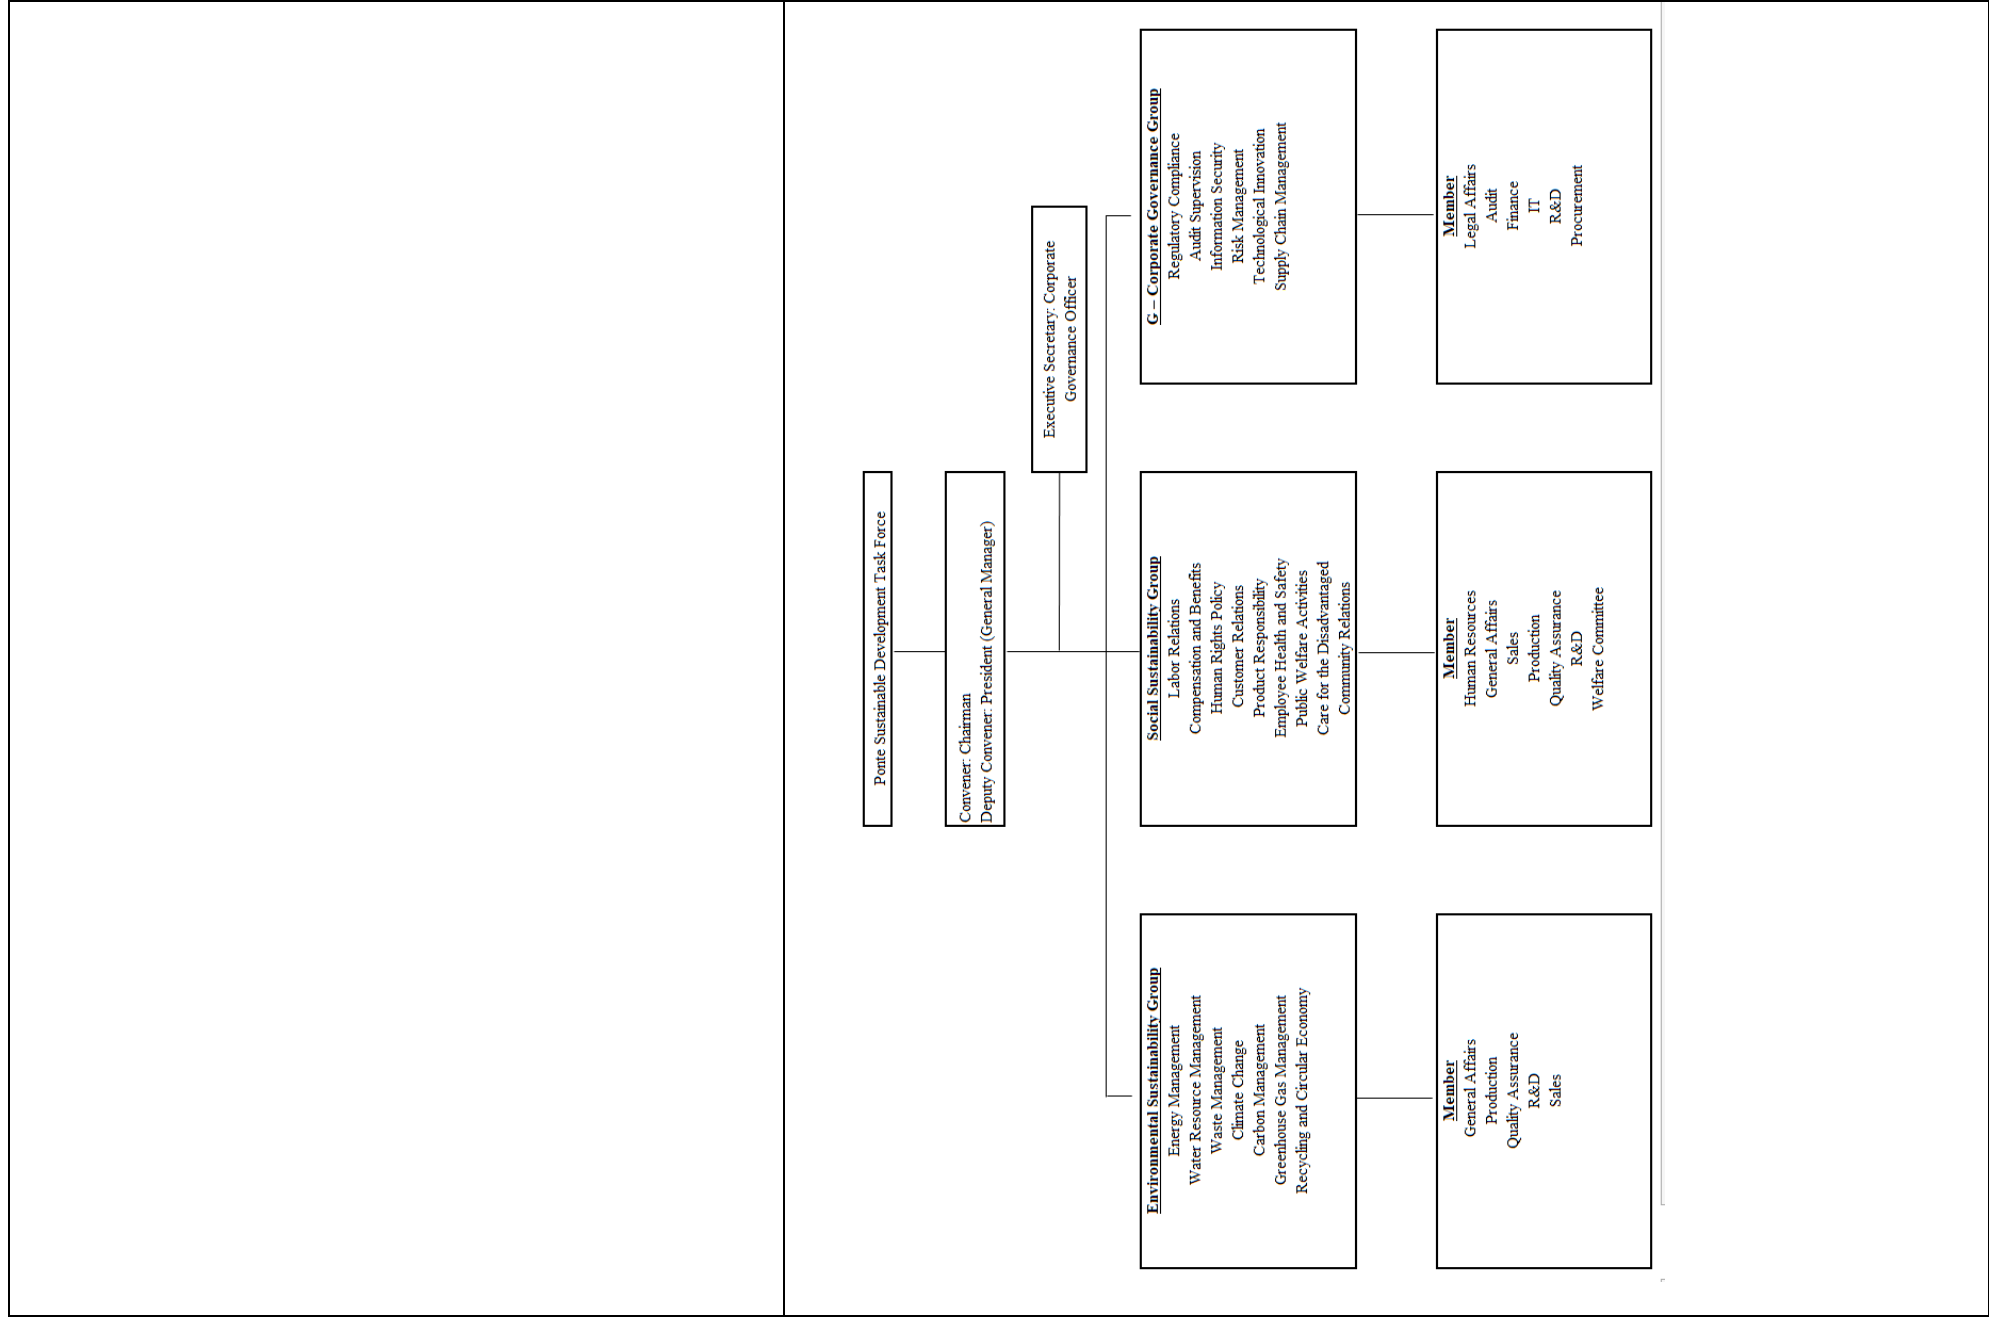

Note 2: The materiality principle refers to environmental, social, or corporate governance issues that have a material impact on the. investors or other stakeholders of the company.

Note 3: For information on the means of disclosure, refer to the sample version of the best practice principles posted on the website. of the Corporate Governance Center. of Taiwan Stock Exchange.

1.5.4 Climate-Related Information for TWSE/TPEX Listed Companies

1 Status of Implementation of Climate-Related Information

ITEM	Implementation status
<p>1. Description of the Board of Directors' and Management's Oversight and Governance of Climate-Related Risks and Opportunities.</p>	<p>In response to climate change-related risks, the Company designates the Board of Directors as the highest supervisory body. It follows relevant regulations and aims to implement comprehensive risk management, ensuring a clear understanding of operational risks and the effectiveness of risk management practices. The Board bears the ultimate responsibility for risk management. Although a "Sustainable Development Committee" has not yet been established under the Board, the "Pontex Sustainable Development Task Force," whose proposals are submitted for Board approval, currently serves as the organizational body for promoting sustainability. The Chairperson and General Manager serve as the convener and deputy convener, respectively. This task force is responsible for identifying and assessing various risks, including operational, financial, information security, legal, human resources, environmental, and climate change risks, and reporting to the Board.</p> <p>I. Organizational Structure:</p>

2. Describe how the identified climate-related risks and opportunities impact the company's business, strategy, and financial planning (short-, medium-, and long-term).

II. Job Responsibilities

1. Coordinate and plan the company's policies to align with ESG (Environmental, Social, and Governance) sustainability development and implement corporate social responsibility initiatives.
2. Supervise or execute the promotion and operation of the company's sustainability development tasks.
3. Collect and compile issues of concern from stakeholders, to serve as key focus areas for the company's sustainability development efforts.
4. Participate in the preparation and organization of data for the sustainability report and related tasks.

Serial No.	Issue Category	Impact Timeframe	Potential Financial Impact	Risk or Opportunity Analysis (Potential Impact on Company)	Response Strategy	Risk/Opportunity Level
1	Transition Risk / Policy and Legal	Short-Term	Increased operational costs	The Climate Change Response Act is expected to impose carbon fees on large carbon emitters starting in 2025. The company will face potential carbon fee risks.	Continue promoting energy-saving and carbon-reduction measures; assess the replacement of outdated equipment in factories.	High
2	Transition Risk / Policy and Legal	Short/Medium-Term	Increased operational costs	The Taiwanese government has declared a 2050 net-zero transition target. The proportion of renewable energy and natural gas in the power mix will increase, potentially causing electricity price hikes.	Focus on energy management, electricity savings, and assess the installation of solar power generation to reduce reliance on purchased electricity.	Very High
3	Transition Risk / Policy and Legal	Medium-Term	Increased operational costs	According to regulations from the competent authority, listed companies must complete carbon inventory by 2026 and	Comply with regulations, complete the factory greenhouse gas inventory by 2026, and seek external consultant guidance to cultivate internal carbon	High

					undergo external verification by 2028.	inventory experts.	
	4	Transition Risk / Market	Medium-Term	Increased operational costs	The European Union will impose a carbon tax starting in 2027, which may increase raw material costs and affect product competitiveness.	Monitor market changes, seek alternative low-cost raw materials based on business conditions, and increase the use of recycled materials to enhance product competitiveness.	Medium
	5	Physical Risk / Chronic	Medium-Term	Increased operational costs	Climate change will raise average temperatures, leading to higher cooling loads and increased electricity consumption for chillers and air conditioning units.	Strengthen equipment and pipeline maintenance; implement regular cleaning procedures for cooling towers and air conditioning systems.	High
	6	Transition Risk / Market	Medium-Term	Decreased product revenue	In response to international customers' low-carbon product demands, products that do not reduce carbon emissions may face higher carbon taxes, decreasing customer purchase intent.	Collaborate with suppliers to complete product carbon footprint surveys and reduction measures; stay updated on industry developments and customer expectations.	High
	7	Physical Risk / Chronic	Medium/Long-Term	Decreased product revenue	Under the RCP8.5 scenario, average drought periods will last 4 months, potentially leading to water shortages and reduced water supply, impacting operations and revenue.	Implement water conservation internally, recycle process water, and establish emergency response plans for water shortages to ensure effective execution of response measures.	Medium
	8	Physical Risk / Acute	Medium/Long-Term	Decreased product revenue	Increased extreme rainfall could cause flooding in factory areas, affecting production.	Install flood detention ponds in the factory and maintain them regularly to reduce the likelihood of flooding caused by heavy rainfall and floods.	Medium
	9	Opportunity / Resource Efficiency	Short-Term	Reduced operational costs	Applying the circular economy concept, assist industries in recycling defective products and waste	Promote a zero-waste goal for factories, enhance communication with customers, expand the reuse and modification	Very High

		cy			materials, reducing raw material usage and waste generation, effectively lowering operational costs.	application areas, and promote single-material formulations to improve recycling convenience.	
	10	Opportunity / Products and Services	Short-Term	Increased product revenue	The global net-zero carbon emission environmental issue is gaining attention. Industry customers demand recycled materials to meet plastic reduction goals and protect ecological systems.	Continue promoting PCR-certified recycled materials to meet customer material requirements and capture global environmental business opportunities.	Very High
3. Describe the financial impact of extreme climate events and transition actions.	<p>Note: Due to the increasing frequency and severity of extreme weather events, shipping may be affected by windstorms, leading to increased transportation costs, which has not yet been included in the assessment.</p>						
4. Describe how the identification, assessment, and management processes of climate risks are integrated into the overall risk management system.	3. For the same table, describe the potential financial impact categorized by short, medium, and long-term timeframes and by risk levels.						
5. If scenario analysis is used to assess resilience to climate change risks, explain the scenarios, parameters, assumptions, analysis factors, and key financial impacts used.	<p>4. The company has considered environmental and climate change risks in its risk types. It understands the nature and characteristics of identifiable risk events and assesses their probability and severity. This is used as a reference to prioritize risk control measures, aiming to prevent or reduce potential risks and keep them within an acceptable range to protect the interests of stakeholders.</p> <p>5. For physical risks, reference the Taiwan Climate Change Projection Information and Adaptation Knowledge Platform (TCCIP) and the National Disaster Prevention and Protection Technology Center. Based on scenarios like RCP 8.5, it estimates the average change rate of temperature rise and the annual total number of days with single-day rainfall exceeding 200 mm from 2021 to 2040.</p>						

6. If there is a transition plan to manage climate-related risks, describe the content of the plan, as well as the indicators and targets used to identify and manage physical and transition risks.

Note: RCPs (Representative Concentration Pathways) represent concentration pathways, which are used in the IPCC's Fifth Assessment Report to redefine future change scenarios based on the change history of concentration levels. They distinguish the scenarios using the difference in radiative forcing (the energy imbalance between 2100 and 1750) as an indicative value. The scenario named RCP2.6 means that the radiative forcing will increase by 2.6 watts per square meter by 2100. RCP4.5, RCP6.0, and RCP8.5 represent increases in radiative forcing of 4.5, 6.0, and 8.5 watts per square meter, respectively.

Assessment Factor	Location
Temperature increase from 2021 to 2040 (RCP 8.5):	Taichung
Average change rate of annual days with single-day rainfall exceeding 200mm (RCP 8.5):	1.5°C
	52%

Assessment Factor	Factory
Sea level rise (RCP 8.5):	Tanzih Factory
Area below the tidal line (flood risk) (RCP 8.5)	No impact
Area below the 2050 flood level (RCP 8.5)	No impact
Average drought duration (RCP 8.5)	No impact
	4 months

6. Our company closely monitors global climate change trends and international response strategies, integrating this issue into the company's sustainable development agenda. We continuously conduct analysis and control, with the key strategic initiatives summarized below. Indicators and targets can be found in section 8:

- (1) Greenhouse Gas Inventory and Verification: In alignment with regulatory requirements, we will gradually complete greenhouse gas inventories and third-party verification.
- (2) Enhancing Energy Efficiency: We will gradually introduce energy management and monitoring systems, replace high-energy-consuming equipment, improve energy efficiency, and reduce energy usage.
- (3) Adoption of Renewable Energy: We plan to install rooftop solar power generation

<p>7.If internal carbon pricing is used as a planning tool, explain the basis for determining the price.</p> <p>8. If climate-related targets are set, describe the activities covered, the scope of greenhouse gas emissions, the planning timeframe, and progress made each year. If carbon offsets or Renewable Energy Certificates (RECs) are used to achieve the targets, explain the source and quantity of the offset reduction or the number of RECs.</p>	<p>systems at our factories and gradually promote the use of renewable energy.</p> <p>(4) Environmentally Friendly Product R&D and Design: In response to the low-carbon transformation trend, our R&D team considers the product lifecycle and value chain carbon emissions, focusing on emissions reduction, waste reduction, safety, and recyclable products, helping downstream customers reduce carbon emissions.</p> <p>(5) Supply Chain Collaboration: We will collaborate with suppliers to explore future emission reduction potential.</p> <p>(6) Strengthening Climate Resilience: We will regularly maintain flood control equipment, gradually establish emergency response SOPs for water use and rainfall, and enhance response capabilities. We will also establish a safety stock mechanism, regularly reviewing it to maintain stable raw material supply.</p> <p>7.Internal Carbon Pricing: We have not yet introduced internal carbon pricing.</p> <p>8. Strategies and Future Goals:</p> <table border="1"> <thead> <tr> <th>Strategy</th><th>Future Goals</th></tr> </thead> <tbody> <tr> <td rowspan="2">Greenhouse Gas Inventory & Verification</td><td>Complete greenhouse gas inventory for all offices and production plants in Taiwan by 2025.</td></tr> <tr> <td>Complete greenhouse gas verification for all offices and production plants in Taiwan by 2026.</td></tr> <tr> <td rowspan="3">Enhancing Energy Efficiency</td><td>Achieve a 1% reduction in electricity consumption in production plants by 2025 compared to 2024.</td></tr> <tr> <td>Fully replace LED lights in office areas.</td></tr> <tr> <td>Implement energy management and monitoring systems in production plants by 2026.</td></tr> <tr> <td>Adoption of Renewable Energy</td><td>Complete installation of 300KW solar power generation capacity by 2025.</td></tr> <tr> <td rowspan="3">Environmentally Friendly Product R&D & Design</td><td>Develop smart cabin ADAS driver assistance, and incorporate near-infrared penetration functionality and sensor cameras for electric vehicle interiors, with NIR packaging material PBT+30GF.</td></tr> <tr> <td>Develop low-rigidity, low-humidity materials with low-carbon GRS recycled carbon fiber MXD6 + rCF and PPS/PA9T/HTN + rCF for eVTOL low-altitude flying vehicles.</td></tr> <tr> <td>Use transparent ABS/PS/PC materials for semiconductor transparent light mask boxes with conductive materials to achieve transparent anti-static functionality.</td></tr> <tr> <td>Supply Chain Collaboration</td><td>Complete carbon inventory survey with the top 10 key suppliers by 2025.</td></tr> <tr> <td>Strengthening Climate Resilience</td><td>Establish and regularly review the safety stock mechanism by 2025.</td></tr> </tbody> </table>	Strategy	Future Goals	Greenhouse Gas Inventory & Verification	Complete greenhouse gas inventory for all offices and production plants in Taiwan by 2025.	Complete greenhouse gas verification for all offices and production plants in Taiwan by 2026. 9. Describe the greenhouse gas inventory and assurance process, along with reduction targets, strategies, and specific action plans (to be filled out in sections 1-1 and 1-2).	9. Greenhouse Gas Inventory and Verification Status: The company has not completed verification for 2024.
---	---

1-1 Recent Two-Year Greenhouse Gas Inventory and Assurance Status

1-1-1 Greenhouse Gas Inventory Information

Provide information on the greenhouse gas emissions (in metric tons of CO ₂ e), emission intensity (in metric tons of CO ₂ e per NT\$ million in revenue), and the scope of data coverage for the past two fiscal years.
The company will complete its greenhouse gas (GHG) inventory in accordance with Article 10 of the "Regulations Governing the Preparation of Annual Reports of Public Companies" and the schedule set forth in the ESG roadmap for TWSE/TPEX-listed companies. The inventory is scheduled to be completed by 2026.

Note 1:

Scope 1 refers to direct GHG emissions from sources owned or controlled by the company.

Scope 2 refers to indirect GHG emissions from the consumption of purchased electricity, heat, or steam.

Scope 3 refers to all other indirect emissions resulting from company activities, not included in Scope 2, occurring from sources not owned or directly controlled by the company.

Note 2:

The boundary for Scope 1 and Scope 2 data shall follow the implementation timeline specified under Article 10, Paragraph 2 of the above-mentioned regulations. Disclosure of Scope 3 information is voluntary.

Note 3:

GHG inventory standards include the Greenhouse Gas Protocol (GHG Protocol) or ISO 14064-1 issued by the International Organization for Standardization.

Note 4:

GHG emission intensity may be calculated per unit of product/service or revenue. At minimum, the emission intensity per NT\$1 million in revenue should be disclosed.

1-1-2 Greenhouse Gas Assurance Information

Disclose the assurance details for the most recent two years as of the date of the annual report, including the scope of assurance, the assurance provider, the assurance standards applied, and the assurance conclusions.

In compliance with the above-mentioned regulations and ESG roadmap, the company will complete GHG assurance by 2028.
--

Note1:

If the company has not obtained complete GHG assurance opinions by the annual report publication date, it shall disclose that “complete assurance information will be published in the sustainability report” or, if no such report is prepared, “complete assurance information will be disclosed via the Market Observation Post System (MOPS),” with full disclosure in the following year’s annual report.

Note 2:

Assurance providers must meet the qualifications outlined by the Taiwan Stock Exchange and Taipei Exchange regarding sustainability report assurance institutions.

Note 3:

For disclosure content, please refer to best practice examples provided on the TWSE Corporate Governance Center website.

1-2 GHG Reduction Targets, Strategies, and Action Plans

"Disclose the base year and corresponding data for greenhouse gas (GHG) reduction, the reduction targets, strategies, specific action plans, and the progress toward achieving those targets
--

The company has not yet completed its GHG inventory based on ISO 14064-1. Reduction targets will be established after completing the inventory in 2026. Although no formal reduction targets are currently set, the company remains committed to its responsibilities as a global citizen and continues to actively implement feasible energy-saving and carbon-reduction measures to pursue sustainable development. °

Note 1:

The implementation timeline must comply with the requirements under Article 10, Paragraph 2 of the relevant regulations.

Note2:

The base year should be the year in which the GHG inventory was completed based on the consolidated financial reporting boundary. For example, companies with capital of NT\$10 billion or more must complete their 2024 GHG inventory by 2025; therefore, 2024 would be the base year. If a company completes the inventory earlier, the earlier year may serve as the base year. The base year data may be calculated as a single year or multi-year average.

Note 3:

For disclosure content, please refer to best practice examples provided on the TWSE Corporate Governance Center website.

1.5.5 Fulfillment of ethical corporate management and deviations and reasons from the " Ethical Corporate Management Best Practice Principles for TWSE/GTSM Listed Companies "

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies” and Reasons
	Yes	No	Abstract explanation	
1. Establishment of ethical corporate management policies and programs	V		1. The Company formulated the "Ethical Corporate Management Best Practice Principles" which is established in chapter 45 of the Company's administrative regulations after approved by the board of directors which serves as the policy basis for the board of directors and management to actively implement their commitment to ethical business operations. The regulation specifies that directors, supervisors, managers, employees, appointees, or those with substantial control ability are prohibited from engaging in any dishonest behavior. The content of the administrative regulations and annual implementation are provided in the section of investment relations-corporate governance on the Company website and disclosed in the annual report by regulations.	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
(1) Does the company have a Board-approved ethical corporate management policy and state in its regulations and external correspondence the ethical corporate management policy and practices, as well as the active commitment of the Board of directors and management towards enforcement of such policy?				
(2) Does the company have mechanisms in place to assess the risk of unethical conduct, and perform regular analysis and assessment of business activities with a higher risk of unethical conduct within the scope of business? Does the company implement programs to prevent unethical	V		2. In response to Article 7, paragraph 2 [Illegal Political Donations] in the "Ethical Corporate Management Best Practice Principles for TWSE/GTSM Listed Companies", the company formulates in Article 11 in the. Administrative regulations that the company and	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies" and Reasons
	Yes	No	Abstract explanation	
conduct based on the above and ensure the programs cover at least the matters described in Paragraph 2, Article 7 of the Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies?			its directors, supervisors, managers, employees, assignees and those with substantial control capabilities directly or indirectly provide donations to political parties or organizations or individuals participating in political activities shall comply with the Political Donations Act and relevant internal procedures of the company, and shall not seek commercial interests or transaction advantages. Furthermore, engaging in other business activities with risks of dishonesty in the scope of business is prohibited under each sub-item, which is based on the relevant regulations to prevent mistakes. To cooperate with the annual internal control audit conducted by the CPAs, the company regularly assesses whether there are any activities within its scope of business that may pose a risk of dishonest behavior.	
(3) Does the company provide clearly the operating procedures, code of conduct, disciplinary actions, and appeal procedures in the programs against unethical conduct? Does the company enforce the programs above effectively and perform regular reviews and amendments?	V		3. In the "Ethical Corporate Management Best Practice Principles", the Company regulates the handling procedures of various violations of integrity, such as prevention of dishonest behaviors, violations of the handling procedures, rewards and punishments, complaint systems and disciplinary actions, etc., and implement them in conjunction with related internal operating methods. "Regulations Governing	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies" and Reasons
	Yes	No	Abstract explanation	
			Procedure for Board of Directors Meetings" is included, which regulates that directors, supervisors, and manager are not allowed to participate in decision-making or voting if there is a conflict of interest in any decision-making or transaction. People who violate the regulations will be punished with warnings, demerits, deducting year-end bonuses, demotion, dismissal and taking legal actions and other punishments. The Company has formulated the“Regulations of Employee Complaint Management", which has been implemented for many years and provide a reasonable channel for the explanation.	
2. Fulfill operations integrity policy (1) Does the company evaluate business partners’ ethical records and include ethics-related. clauses in business contracts?	V		(1) The Company conducts background checks on all suppliers and customers by consulting government websites for their business status and requires them to provide relevant documents for credit evaluation and company profile registration. All counterparties are required to sign a “Commitment to Integrity” to ensure honest business dealings, and contractual clauses include penalties for violations of integrity and ethical conduct.	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies" and Reasons
	Yes	No	Abstract explanation	
(2) Does the company have a unit responsible for ethical corporate management on a full-time. Basis under the Board of directors which reports the ethical corporate management policy and programs against unethical conduct regularly (at least once a year) to the Board of directors while overseeing such operations?	V		(2) The Office of the President is designated as the dedicated unit responsible for promoting corporate integrity within the Company. At the end of each year, it reports the implementation status to the Board of Directors.	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
(3) Does the company establish policies to prevent conflicts of interest and provide appropriate communication channels, and implement them?	V		(3) The Company has established clear conflict-of-interest prevention policies in its "Board Meeting Rules" and "Code of Ethical Conduct." Specific recusal provisions for directors are included in the Board Meeting Rules. All employees are governed by the "Commitment to Integrity" and the "Employee Code of Conduct." The Company has also set up a dedicated opinion box for the President and a whistleblower mailbox to provide reporting channels.	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
(4) Does the company have effective accounting and internal control systems in place to implement ethical corporate management? Does the internal audit unit follow the results of unethical conduct risk assessments and devise audit plans to audit the systems accordingly to prevent unethical conduct, or hire outside accountants to perform the audits?	V		(4) The Company maintains a comprehensive accounting system and internal control system to support the implementation of integrity management. These systems are regularly reviewed and updated to ensure their effectiveness. Internal auditors conduct audits according to the annual audit plan, and audit reports are submitted to the Board of Directors quarterly. An external CPA	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies" and Reasons
	Yes	No	Abstract explanation	
(5) Does the company regularly hold internal and external educational trainings on operational integrity?	V		<p>firm conducts an annual external audit of the internal control system.</p> <p>(5) All employees are required to re-sign the "Commitment to Integrity" at the beginning of each year, reinforcing the Company's culture of integrity and honesty. The commitment is also listed as the first item in the Company's "Eight Core Work Guidelines" and is displayed on large posters across all domestic and overseas sites to emphasize the importance of ethical business practices. The Company also conducts external training sessions in coordination with relevant government agencies. For example, on June 3, 2024, the Deputy Director of the Fengyuan Investigation Office, Taichung City Investigation Bureau, Ministry of Justice, was invited to conduct training on trade secret protection and anti-corruption measures.</p>	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
<p>3. Operation of the integrity channel</p> <p>(1) Does the company establish both a reward/punishment system and an integrity hotline? Can the accused be reached by an appropriate person for follow-up?</p>	V		<p>(1) The Company has established a whistleblower mailbox at ethics@pontex.com. Designated personnel are assigned to handle reports, ensuring strict confidentiality of both the whistleblower's identity and the reported content. For reports that reveal violations or harm to the Company's interests, rewards are granted in accordance with the "Employee Rewards and Disciplinary Management Policy."</p>	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies" and Reasons
	Yes	No	Abstract explanation	
(2) Does the company have in place standard operating procedures for investigating. accusation cases, as well as follow-up actions and relevant post-investigatio confidentiality measures?	V		(2) The investigation procedures and confidentiality mechanisms for handling whistleblower reports are carried out in accordance with the reporting system outlined in the "Code of Ethical Conduct" and the "Employee Complaint Handling Policy."	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
(3)Does the company provide proper whistleblower protection?	V		(3) Whistleblower reports are managed through a dedicated mailbox and by assigned personnel, ensuring that whistleblowers are protected from improper treatment due to disclosure of their reports.	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
4. Strengthening information disclosure (1) Does the company disclose its ethical. The Corporate management policies and the. results of its implementation on the company's website and MOPS?	V		The company discloses the Ethical Corporate Management Best Practice Principles and implementation on the Company website, annual report, and MOPS, updates the content of the implementation report and submitted to the board of directors every year.	Compliance with the integrity and operation guidelines for listed and over-the-counter companies / None.
5. If the company has established ethical corporate management policies based on the "Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies", please describe any discrepancy between the policies and their implementation. The Company formulated the "Ethical Corporate Management Best Practice Principles" based on the content announced by the authority, incorporated it into the company's management regulations, and disclosed it on the company's website. There is no difference in operation.				

Evaluation item	Implementaion status (Note 1)			Deviations from the "Ethical Corporate Management Best Practice Principles of TWSE/GTSM Listed Companies" and Reasons
	Yes	No	Abstract explanation	

6. Other important information to facilitate a better understanding of the company's ethical corporate management policies:

According to the various regulations of public companies, the Company has formulated operation regulations, except for the above mentioned "Regulations Governing Procedure for Board of Directors Meetings" to avoid the interests of directors. The Company has also formulated "Management of Avoiding Insider Trading", " Procedure of Tackling Internal Material Information" and other measures which are helpful for ethical corporate management, and the latest regulations of the competent authority are considered to make amendments to the provisions.

Note: Regardless of whether the evaluation item is achieved or not, the company shall state an appropriate explanation.

8 If the company has formulated the Corporate Governance Best Practice Principles and related rules and regulations, the way of searching should be disclosed: For the company's "Corporate Governance Best Practice Principles", please visit the company's official website link (<http://www.pontex.com>) or check the corporate governance page on the Market Observation Post System.

9 Other important information regarding corporate governance:

For the Company's "Corporate Social Responsibility Best Practice Principles", please visit the Company's official website link (<http://www.pontex.com>) or check the corporate governance page on the Market Observation Post System.

10 Implementation of internal control for disclosure:

1. Declaration of internal control: Please refer to p.55.

2. If a CPA is appointed to conduct a special audit on the internal control system, disclose the auditor's report: None.

11 The Company and insiders were punished under the law or the violation of the internal control system up to the date this report was printed. If the punishment result may have a significant impact on shareholders' rights or securities prices, the content, the major defect, and the status of rectification shall be specified: None.

1.5.6 Major Resolutions of Shareholders' Meetings and Board Meetings in the most recent fiscal year as well as the current fiscal year up to the date of publication of the annual report:

Date	Resolution	Implementation
2024.06.06	1. Adoption of the 2023 Business Report and Financial Statements	Approved.
	2. Adoption of 2023 surplus earning or loss off-setting.	Approved, and the implementation has been completed in accordance with the resolution of the shareholders' meeting.

Date	Board of directors	Major resolutions
2024.01.11	Board of directors	<p>1. Proposal to change the CPA firm and signing CPA starting from Q4 2023, including evaluation of independence and competence – submitted for review.</p> <p>2. Proposal regarding the remuneration of the new CPA – submitted for review.</p>
2024.03.07	Board of directors	<p>1. 2023 Statement on Internal Control System – submitted for review.</p> <p>2. 2023 Business Report and Financial Statements – submitted for review.</p> <p>3. Proposal regarding 2023 losses – submitted for review.</p> <p>4. Proposal to elect a new Independent Director – submitted for review.</p> <p>5. Proposal to determine the date, time, location, and other matters for the 2024 Annual General Meeting (AGM) – submitted for review.</p> <p>6. Proposal to lift non-competition restrictions for Directors – submitted for review.</p> <p>7. Matters related to proposals by shareholders holding more than 1% – submitted for review.</p> <p>8. Nomination of independent director candidates by shareholders holding more than 1% – submitted for discussion.</p> <p>9. 2023 Board performance evaluation results – submitted for review.</p> <p>10. Proposal to provide endorsement and guarantee for Pontex Vietnam – submitted for review.</p> <p>11. Proposal to determine the issuance price and related matters of private placement of common shares – submitted for review.</p>
2024.04.25	Board of directors	<p>1. Resolved to finalize the list of nominated Director candidates for the 2024 Annual General Meeting – submitted for discussion.</p> <p>2. Report on the status of implementation, fund utilization, project progress, and effectiveness of the private placement of common shares approved by the 2022 and 2023 AGMs.</p>

Date	Board of directors	Major resolutions
		<p>3. Proposal to amend certain provisions of the “Procedures for Handling Material Information and Prevention of Insider Trading” – submitted for review.</p> <p>4. Proposal to lift the restriction on non-competition for Directors – submitted for review.</p>
2024.06.06	Board of directors	<p>1. Proposal to authorize the Chairman to handle matters related to the Company's factory relocation plan – submitted for review.</p> <p>2. Proposal to establish “Procedures for Application and Resumption of Trading Suspension” – submitted for review.</p>
2024.08.08	Board of directors	<p>1. Proposal to authorize the Chairman to handle financing matters with First Commercial Bank – submitted for review.</p> <p>2. Proposal for the Company’s subsidiary Qingyuan Pontex Composite Materials Co., Ltd. to convert 40 mu of farmland into industrial land – submitted for review.</p>
2024.11.07	Board of directors	<p>1. 2025 Audit Plan – submitted for review.</p> <p>2. Proposal to establish “Sustainability Information Management Operations” as part of the internal control system – submitted for review.</p> <p>3. 2025 Business Report – submitted for review.</p> <p>4. Evaluation of the independence and competence of the CPA – submitted for review.</p> <p>5. Proposal for 2025 CPA remuneration – submitted for review.</p> <p>6. Nomination of the custodian of the Company's official seal used for endorsement and guarantee – submitted for review.</p> <p>7. Proposal for year-end bonuses for executives and year-end red packets for Directors for FY2024 – submitted for review.</p>
2025.03.06	Board of directors	<p>1. 2024 Statement on Internal Control System – submitted for review.</p> <p>2. 2024 Business Report and Financial Statements – submitted for review.</p> <p>3. Proposal regarding 2024 losses – submitted for review.</p> <p>4. Proposal for the re-election of Directors – submitted for review.</p> <p>5. Proposal to set the date, time, and location for the 2025 AGM – submitted for review.</p> <p>6. Matters related to shareholder proposals (over 1%) – submitted for review.</p>

Date	Board of directors	Major resolutions
		<p>7.Nomination of Director candidates by shareholders holding more than 1% – submitted for discussion.</p> <p>8.Proposal to amend the Company’s Articles of Incorporation – submitted for review.</p> <p>9.Proposal to revise “Board Meeting Rules of Procedure” – submitted for review.</p> <p>10.Proposal to revise “Corporate Governance Best Practice Principles” – submitted for review.</p> <p>11.Proposal to revise “Audit Committee Charter” – submitted for review.</p> <p>12.2024 Board (including functional committees) performance evaluation results – submitted for review.</p> <p>13.Proposal to provide endorsement and guarantee for Pontex Vietnam – submitted for review.</p> <p>14.Proposal to engage Cushman & Wakefield Taiwan to handle the sale of the Taichung Tanzi headquarters property – submitted for review.</p> <p>15.Proposal to acquire 100% equity of Chi Xu Enterprise Co., Ltd., including lease rights to the Taisugar land in Tanzi Juxing Industrial Park, as a new factory site – submitted for review.</p>
2025.04.23	Board of directors	<p>1. Finalization of the list of Director candidates for the 2025 AGM – submitted for discussion.</p> <p>2. Report on the implementation status, fund utilization, project progress, and effectiveness of private placement cases approved by the 2023 AGM.</p> <p>3.Proposal to lift non-competition restrictions for newly elected Directors – submitted for review.</p>

Board Members or Supervisors Who Disagree with Important Resolutions Passed by the Board in the Most Recent Year and Up to the Date of the Annual Report’s Printing, and Have Written Records or Statements:None

Pontex Polyblend Co., Ltd.

Statement of Internal Control System

Date: March 6, 2025

Based on the findings of a self-assessment, Pontex Polyblend Co., Ltd. states the following with regard to its internal control system during the year 2024:

1. Pontex Polyblend Co., Ltd.'s Board of Directors and management are responsible for establishing, implementing, and maintaining an adequate internal control system. The internal control system is designed to provide reasonable assurance over the effectiveness and efficiency of our operations (including profitability, performance and safeguarding of assets), reliability, timeliness, transparency and regulatory compliance of our reporting, and compliance with applicable rulings, laws and regulations.

2. An internal control system has inherent limitations. No matter how perfectly designed, an effective internal control system can provide only reasonable assurance of accomplishing its stated objectives. Moreover, the effectiveness of an internal control system may be subject to changes due to extenuating circumstances beyond our control. Nevertheless, our internal control system contains self-monitoring mechanisms, and Pontex Polyblend Co., Ltd. takes immediate remedial actions in response to any identified deficiencies.

3. Pontex Polyblend Co., Ltd. evaluates the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing Establishment of Internal Control Systems by Public Companies (herein below, the Regulations). The criteria adopted by the Regulations identify five key components of managerial internal control: (1) control environment, (2) risk assessment, (3) control activities, (4) information and communication, and (5) monitoring activities. Each component also includes several items which can be found in the Regulations.

4. Pontex Polyblend Co., Ltd. has evaluated the design and operating effectiveness of its internal control system according to the aforesaid Regulations.

5. Based on the findings of such evaluation, Pontex Polyblend Co., Ltd. believes that, on December 31, 2024, it has maintained, in all material respects, an effective internal control system (that includes the supervision and management of our subsidiaries), to provide reasonable assurance over our operational effectiveness and efficiency, reliability, timeliness, transparency and regulatory compliance of reporting, and compliance with applicable rulings, laws and regulations.

6. This Statement is an integral part of Pontex Polyblend Co., Ltd.'s annual report and prospectus, and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Act.

7. This Statement was passed by the Board of Directors in their meeting held on March 6 2025, with none of the 11 attending directors expressing dissenting opinions, and the remainder all affirming the content of this Statement.

Pontex Polyblend Co., Ltd.

Chairman: Henry Global Investment Co., Ltd.

General Manager: Shen, Mao-Ken

Dividend Policy

According to the company's Articles of Incorporation, the company is growing. Considering the company's long-term financial planning and capital needs, the distribution of earnings is the company's annual settlement. The company shall after its losses have been covered and all taxes and dues have been paid and at the time of allocating surplus profits, first set aside ten percent of such profits as a legal reserve. Additionally, after contributing or reversing the special reserve by the regulations of the authority, the Board of directors shall propose distribution for the net remainder and the accumulated undistributed earnings of the previous year and submit to the shareholders' meeting for a resolution on shareholder dividends, and allocate the net remainder:

- Employee bonuses should be allocated no less than 1% as employee compensation, and the Board of Directors suggests distribution according to the current year's earnings. The object of distribution of dividends and bonuses is authorized by the Board of Directors to the chairman by the Company's "Regulation of employee dividends".
- The remuneration of directors and supervisors shall not exceed 8%, and the Board of Directors shall suggest distribution according to the current year's earnings.
- The company's dividend policy should take into account the profit situation, capital structure, and future operational needs. Every year, the Company will allocate no less than 10% of distributable earnings to distribute to shareholders as dividends. However, if the dividend per share based on the distributable earnings is less than 0.5 yuan, it may not be distributed. The dividends may be distributed in cash or stock, but the maximum limit for stock dividends is 10% of the total dividend amount. After the Board of Directors drafts the earnings distribution plan, it shall be submitted to the shareholders' meeting for decision.

2. Proposed distribution of dividends at the annual shareholders' meeting: None

Due to the company's net loss after tax in the year of 2023 was NT\$69,898 thousand dollars ,and accumulated deficit in the year of 2023 was 69,909 thousand dollars. Therefore, there isn't any dividend distribution this period.

1.3 Impact on 2023 business performance and EPS resulting from stock dividend distribution proposed in shareholders' meeting: None.

1.4 Compensation of Employees, Directors and Supervisors:

1. According to the Company's Articles of Incorporation, the company is growing. Considering the company's-term financial planning and capital needs, the distribution of earnings is the company's annual settlement. The company shall after its losses have been covered and all taxes and dues have been paid and at the time of allocating surplus profits, first set aside ten percent of such profits as a legal reserve. Additionally, after contributing or reversing the special reserve by the regulations of the authority, the board of directors shall propose distribution for the net remainder and the accumulated undistributed earnings of the previous year, and submit to the shareholders' meeting for a resolution on shareholder dividends, and allocate the net remainder:

- a. Employee bonuses should be allocated no less than 1% as employee compensation, and the Board of Directors suggests distribution according to the current year's earnings. The object of distribution of dividends and bonuses is authorized by the Board of Directors to the chairman by the Company's "Regulation of Employee Dividends ".
 - b. The remuneration of directors and supervisors shall not exceed 8%, and the Board of Directors shall suggest distribution according to the current year's earnings.
 - c. The company's dividend policy should take into account the profit situation, capital structure, and future operational needs. Every year, the Company will allocate no less than 10% of distributable earnings to distribute to shareholders as dividends. However, if the dividend per share based on the distributable earnings is less than 0.5 yuan, it may not be distributed. The dividends may be distributed in cash or stock, but the maximum limit for stock dividends is 10% of the total dividend amount. The balance shall be retained by the laws and regulations. After the Board of Directors drafts the earnings distribution plan, it shall be submitted to the shareholders' meeting for decision.
2. The basis for estimating the amount of employee, director, and supervisor compensation, for calculating the number of shares to be distributed as employee compensation, and the accounting treatment of the discrepancy, if any, between the actual distributed amount and the estimated figure, for the current period: None.
3. The distribution condition of compensation approved by the Board of Directors:
- (1) The amount of any employee compensation distributed in cash or stocks and compensation for directors and supervisors. If there is any discrepancy between that amount and the estimated figure for the fiscal year these expenses are recognized, the discrepancy, its cause, and the status of treatment shall be disclosed: None.
 - (2) The amount of any employee compensation distributed in stocks, and the size of that amount as a percentage of the sum of the after-tax net income stated in the parent company only financial reports or individual financial reports for the current period and total employee compensation: None.

4.The actual allocation of employees' , directors' and supervisors' compensation which. include the number, amount, and stock price in the previous year. If there is any difference between the listed employees' , ,directors' and supervisors' compensation, the difference, reason, and solution shall be stated: None.

The annual report shall disclose unexpired employee subscription warrants issued by the company in existence as of the date of publication of the annual report and shall explain the effect of such warrants upon shareholders'equity. Any privately placed employee subscription warrants shall be prominently. identified as such: None.
2. Up to the date of publication of the annual report, employee stock options were granted. to the management team and the top 10 employees: None.

6 、ISSUANCE OF NEW RESTRICTED EMPLOYEE SHARES: NONE

1. For all new restricted employee shares for which the vesting conditions have not yet been. met for the full number of shares, the annual report shall disclose the status up to the date of publication of the annual report and the effect on shareholders' equity: None.
2. Up to the date of publication of the annual report, employee restricted stock was granted. to the managementteam and the top 10 employees: None.

7 、STATUS OF NEW SHARES ISSUANCE IN CONNECTION WITH MERGERS AND ACQUISITIONS: NONE

8 、FUNDING PLANS AND IMPLEMENTATION:

Item	Explanation
Project Content	Private placement of Private cash capital increase common shares in the year of 2022.
Date and Amount approved by the shareholder's meeting	The company's shareholders' meeting, held on June 2, 2022, resolved to authorize the board of directors to conduct private placement cash capital increase for common shares up to 30,000,000 shares within one year from the date of the shareholders' meeting resolution, to be conducted in three installments.

Fund resources	On March 23, 2023, the first fund-raising was completed, issuing 6,666,000 shares at a price of NT\$10.00 per share, total was NT\$66,660,000. There remained an unissued quota of 23,334,000 shares. As the deadline approached, the board of directors approved on April 27, 2023, and the shareholders' meeting on June 7, 2023, passed the resolution to discontinue further proceedings.	
Funding plans and implementation	Enriched operation capital, improved financial structure, repaid bank loans ,and all private placement funds have been fully utilized.	
Benefit analysis of the plan	The financial structure has been improved, been reduced current liabilities and interest expense, and been increased the current ratio and quick ratio.	
The date of submission to the information reporting website	Relevant information should be reported within two days from the date of the board resolution.	April 21, 2022
	Relevant information should be reported within two days from the actual pricing date.	Phase 1: March 9 ,2023
	Relevant information should be reported within fifteen days from the completion date of the payment of capital or price	Phase 1: March 23,2023
	Quarterly Report on the Utilization of Private Placement Securities Funds	Phase 1: July 10 ,2023

IV. OPERATIONAL HIGHLIGHTS

1 、 BUSINESS ACTIVITIES

1.1 Business Scope

1.1.1 Major Business:

According to the Company's Business Scope in the Change Registration Form the main business as below:

- (1) C801100 Synthetic Resin and Plastic Manufacturing
- (2) C801990 Other Chemical Materials Manufacturing
- (3) C805070 Reinforced Plastic Products Manufacturing
- (4) C805050 Industrial Plastic Products Manufacturing
- (5) C801030 Precision Chemical Material Manufacturing
- (6) C805990 Other Plastic Products Manufacturing
- (7) F107200 Wholesale of Chemical Feedstock
- (8) F207200 Retail Sale of Chemical Feedstock
- (9) F107990 Wholesale of Other Chemical Products
- (10) F207990 Retail Sale of Other Chemical Products
- (11) CK01010 Footwear Manufacturing
- (12) F104110 Wholesale of Cloths, Garments, Shoes, Hats, Umbrellas and Clothing.
Accessories
- (13) F204110 Retail Sale of Cloths, Garments, Shoes, Hats, Umbrellas and Clothing
Accessories
- (14) CF01011 Medical Devices Manufacturing
- (15) F108031 Wholesale of Medical Devices
- (16) F208031 Retail Sale of Medical Apparatus
- (17) CA04010 Surface Treatments
- (18) CQ01010 Mold and Die Manufacturing
- (19) F106030 Wholesale of Molds
- (20) F206030 Retail Sale of Die
- (21) CC01080 Electronics Components Manufacturing
- (22) F119010 Wholesale of Electronic Materials
- (23) F219010 Retail Sale of Electronic Materials
- (24) CE01030 Optical Instruments Manufacturing
- (25) F113030 Wholesale of Precision Instruments
- (26) F213040 Retail Sale of Precision Instruments
- (27) CN01010 Furniture and Decorations Manufacturing
- (28) F105050 Wholesale of Furniture, Bedding Kitchen Utensils and Fixtures
- (29) F205040 Retail Sale of Furniture, Bedding Kitchen Utensils and Fixtures
- (30) F107030 Wholesale of Cleaning Supplies
- (31) F207030 Retail Sale of Cleaning Supplies
- (32) CB01010 Mechanical Equipment Manufacturing
- (33) F113010 Wholesale of Machinery
- (34) F213080 Retail Sale of Machinery and Tools
- (35) CB01990 Other Machinery Manufacturing
- (36) F113990 Wholesale of Other Machinery and Tools
- (37) F213990 Retail Sale of Other Machinery and Tools

- (38) C802100 Cosmetics Manufacturing
- (39) F108040 Wholesale of Cosmetics
- (40) F208040 Retail Sale of Cosmetics
- (41) CC01110 Computer and Peripheral Equipment Manufacturing
- (42) F113050 Wholesale of Computers and Clerical Machinery Equipment
- (43) F118010 Wholesale of Computer Software
- (44) F218010 Retail Sale of Computer Software
- (45) CH01010 Sporting and Athletic Articles Manufacturing
- (46) F109070 Wholesale of Culture, Education, Musical Instruments and Educational
Entertainment Supplies
- (47) F209060 Retail Sale of Culture, Education, Musical Instruments and Educational.
Entertainment Supplies
- (48) C701010 Printing
- (49) H701010 Housing and Building Development and Rental
- (50) H701040 Specific Area Development
- (51) F401010 International Trade
- (52) F199990 Other Wholesale Trade
- (53) F299990 Retail Sale of Other Retail Trade Not Elsewhere Classified
- (54) F399990 Retail sale of Other Integrated
- (55) C111010 Tea Manufacturing
- (56) F102050 Wholesale of Tea Leaves
- (57) F102030 Wholesale of Tobacco Products and Alcoholic Beverages
- (58) F203020 Retail Sale of Tobacco and Alcohol
- (59) C110010 Beverage Manufacturing
- (60) F102040 Wholesale of Nonalcoholic Beverages
- (61) F102170 Wholesale of Foods and Groceries
- (62) F203010 Retail Sale of Food, Grocery and Beverage
- (63) C901010 Ceramic and Ceramic Products Manufacturing
- (64) F106050 Wholesale of Pottery, Porcelain and Glassware
- (65) F301020 Supermarkets
- (66) F399010 Convenience Stores
- (67) F501030 Beverage Shops
- (68) I103060 Management Consulting
- (69) ZZ99999 All business activities that are not prohibited or restricted by law, except
those that are subject to special approval.

1.1.2. Revenue distribution:

Product	2024		2023		2022	
	AMT	%	AMT	%	AMT	%
Equipment injection component	100,831	18.23	125,694	21.15	278,675	29.44
Plastic compound material	452,408	81.77	468,619	78.85	667,808	70.56
Sum	553,239	100.00	594,313	100.00	946,483	100.00

(1) Equipment Division

- a. Components for professional sports equipment, footwear accessories, and outsole injection molding.
- b. Precision mold design and manufacturing.
- c. Injection molding of footwear accessories and outsoles, as well as precision mold design and fabrication services.
- d. 2D and 3D design and development services related to footwear materials.
- e. Injection molding for TPU casual shoe uppers.
- f. Injection molding of eco-friendly material-based tableware.
- g. Injection molding of components for Taiwan High Speed Rail.
- h. Injection molding of automotive radiator components.
- i. Injection molding of various industrial products and 3C (computer, communication, and consumer electronics) product casings.

(2) Composite Materials Division

- a. Manufacturing and sales of modified engineering plastic composites.
- b. Sales of customized specialty plastic resins and general-purpose resins.
- c. Development and manufacturing of customer-end products and specialized raw materials.
- d. Integrated services: mold development, processing, finished product manufacturing, and sales.
- e. Production and sales of modified materials such as rPET recycled plastics and biodegradable materials.
- f. Sales of high-performance engineering plastics with advanced features, including halogen-free flame retardancy and low-temperature resistance.
- g. Proprietary metallic-like patented materials developed in-house for production and sale.
- h. Manufacturing and extrusion of solar panel frame materials.
- i. Production of hot-pressed sheets using textile fibers.

(3) Products under development or planned for development

- a. High-value composite materials.
- b. Functional biodegradable plastics.
- c. High-temperature-resistant biodegradable materials.
- d. Heat-resistant engineering plastics for electronic applications.
- e. Electroplatable, high-specific gravity engineering plastics.
- f. High-performance composite materials for extrusion molding.

1-3 、INDUSTRY OVERVIEW

1. Current Industry Situation and Development

The company's products are divided into two business divisions: the Equipment Division and the Composite Materials Division. Below is the industry overview for each division:

(1) Equipment Division:

- (A) The footwear industry is a labor-intensive sector, and its development is influenced by various factors such as land, labor costs, raw material supply, environmental protection, and sales markets. Over the past two decades, Asia has become a major hub for large brand shoe manufacturers due to its competitive advantages. While Chinese footwear factories have gradually shifted overseas in recent years, with Vietnam progressively taking over, Asia continues to maintain its position as the world's largest footwear manufacturing center. Approximately 85% of shoes globally are produced in Asian countries such as China, India, Vietnam, Indonesia, Thailand, and Pakistan. Due to intense global competition in the athletic footwear industry, the competition in the entire footwear sector is not only between brands but also within the supply chain. Brand customers increasingly emphasize supply chain management. Major brands like Nike and Adidas are now deeply involved in the entire process from raw material procurement, product planning, design, material selection, mold manufacturing to production equipment, and are strengthening close collaborations with core suppliers to achieve optimal production-sales integration. The company's specialized injection molding of key components will continue to play an indispensable role in the future.
- (B) The footwear market is primarily divided into sports shoes, casual shoes, sandals, and other types. In 2019, the total value of the footwear market was approximately USD 435.139 billion, with the athletic footwear market accounting for approximately USD 20.565 billion, showing an annual growth rate of 5-10%. According to international professional institutions, the main consumer markets for global athletic footwear products are concentrated in two regions: economically developed countries and regions such as the United States, European Union, Japan, and Canada, as well as populous countries like China, India, Brazil, and Indonesia. Modern consumers are increasingly focused on recreational sports, and despite a sluggish global economy, the global sports footwear market continues to grow year by year. The global athletic footwear market is highly concentrated, with Nike (including the Jordan brand) and Adidas dominating, together accounting for over half of the global market share. Other well-known brands include ASICS (Japan), PUMA (Germany), and New Balance (USA), and the top five brands collectively represent around 70% of the market share. Additionally, with rising incomes, China's market is becoming more important. While first-tier cities still predominantly favor foreign brands, domestic brands like Anta, Li-Ning, 361 Degrees, and Xtep are emerging winners in intense competition, gradually gaining market share in second- and third-tier cities. Over time, these domestic brands may change the landscape of the global sports footwear market. Under Armour, which rose rapidly and peaked in 2015, has seen a decline in its footwear segment in recent years, losing its significant impact on the global market.
- (C) Historically, China has been a dominant player in the footwear industry, consistently growing at an annual rate of 10-20%. In 2014, China's footwear production reached its peak, with an annual output of 14.3 billion pairs. However, as labor costs have gradually increased, many global footwear brands have shifted production to other countries. Notably, Vietnam has become the fastest-growing region in the global footwear industry. With numerous bilateral free trade agreements (FTAs) and multilateral economic agreements signed by Vietnam, as well as its membership in CPTPP, the country's footwear industry is expected to maintain strong growth in the coming years.
- (D) Due to changes in the manufacturing environment and global trends in footwear brand operations, mid- and low-priced footwear products face high domestic production costs in Taiwan, making it difficult

to compete with regions like Southeast Asia and mainland China that benefit from lower labor costs. Under the management philosophy of "Rooted in Taiwan, with a global layout," the company continues to retain order-taking and innovative research and development activities in Taiwan while shifting production to overseas locations. This strategy leverages Taiwan's advantages in talent, management, technology, and capital, as well as the relatively low labor and land costs in China and Vietnam, enabling the company to gradually expand its operations and global market share.

- (E) The company completed the transfer of its domestic footwear production lines to China in 2013, and its new Vietnam plant was officially completed and started production in September 2017. The company now operates two major production bases in China and Vietnam, manufacturing products for international brands such as Nike and Crocs. The strategic location in Vietnam, coupled with CPTPP advantages, enables the company to stay competitive in regional markets, further strengthening its position in the industry. In the long term, major international brands will continue to build stable outsourcing partnerships in Asia, offering the company excellent opportunities to become a key player in the global supply chain.
- (F) In alignment with government renewable energy development policies, the company is developing durable, corrosion-resistant, and weather-resistant solar panel frames to replace certain aluminum alloy frames in solar modules.

(2) Composite Materials Division:

- (A) Composite engineering plastics, due to their lightweight, strength, and insulation properties, are widely used in automotive, packaging, construction materials, 3C electronics, and machine components, making them a crucial material for supporting various industries and their key or peripheral components.
- (B) Engineering plastics have become the fastest-growing material in the global plastic market. In many end-use products, they are gradually replacing traditional materials like metals, wood, ceramics, and glass. In Asia, particularly in China, the demand for engineering plastics is growing at an accelerated pace. Capturing the rapid growth of the engineering plastics market is key to sustaining long-term growth.
- (C) Currently, automotive and electronics are the major application markets for engineering plastics, with polycarbonate (PC) being the most widely used, followed by polyamide (PA) and polypropylene (PP) engineering plastics. As application product trends and regulatory requirements evolve, the automotive industry is moving toward lightweight, energy-efficient, and eco-friendly designs, while electronics are focusing on being thinner and smaller with minimal environmental impact.
- (D) Global giants are actively investing in environmentally friendly production processes, which in turn is driving the upstream raw materials sector to adopt sustainable practices. The green supply chain has become an essential factor for companies to secure international business opportunities. As engineering plastics are positioned at the upstream materials end of the industry chain, the growing emphasis on recycling and eco-friendly materials such as r-PET will attract more manufacturers to invest in R&D in these areas, tapping into the emerging green market.
- (E) The company is actively involved in the global market for recycled materials, with its Taiwan and Vietnam plants expanding their footprint in the recycling industry. By offering a diversified range of composite materials, the company is well-positioned to take advantage of favorable tariff policies under CPTPP and expand its collaboration opportunities with international customers.

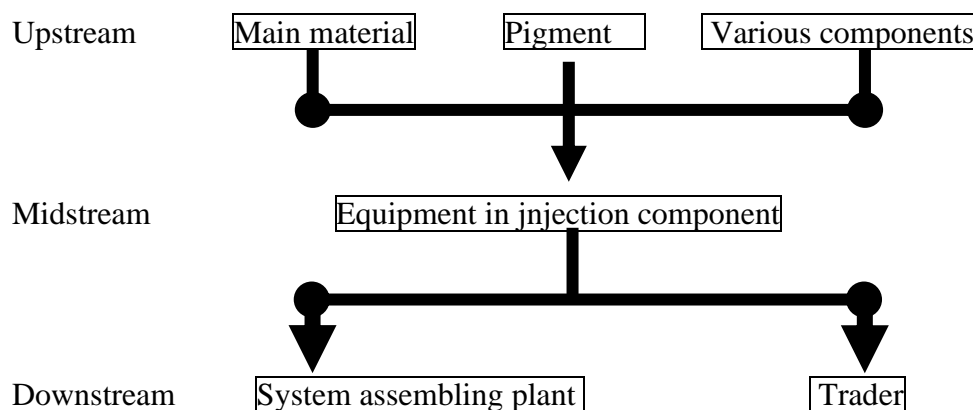

(F) In response to global carbon reduction trends and Taiwan's 2050 net-zero carbon emissions policy, the company is developing various carbon-reduction products and providing carbon footprint data for upstream and downstream clients to align with carbon-reduction goals.

(G) According to statistics, global fiber production reached 113 million tons in 2021, with synthetic fibers made from petrochemical raw materials accounting for over 72.2 million tons, or 64% of the total. It is expected that global fiber production will grow to 149 million tons by 2030, with synthetic fibers continuing to increase. The massive volume of textile waste and fiber recycling remains a pressing environmental issue for the textile industry. In 2023, the company completed Taiwan's first fully automated hot-pressing production line, using discarded clothing, fabric, or textile fibers as raw materials. Through the company's patented process (approved), it manufactures versatile colored hot-pressed boards. These boards, sized at 240cm x 120cm, conform to standard wood panel specifications and offer advantages such as pressure resistance, moisture resistance, and minimal deformation. The boards can be cut, molded, nailed, or glued for diverse applications, such as wall decor, home shelves, mall displays, exhibition bases, frames, signs, and indoor art. By utilizing the fabric's original colors without dyeing, the products showcase vibrant patterns and a modern aesthetic.

The establishment of the hot-pressing factory has attracted visits from international clothing brands and textile manufacturers from Japan, South Korea, and India. The company transforms textile fibers into exquisite hardboards, creating new international market opportunities. This represents a new generation of building materials and home decor products with distinctive features. With a forward-thinking approach, the company integrates the upstream and downstream industries, contributing to the global 2050 net-zero carbon goal and leading the way in the circular textile economy.

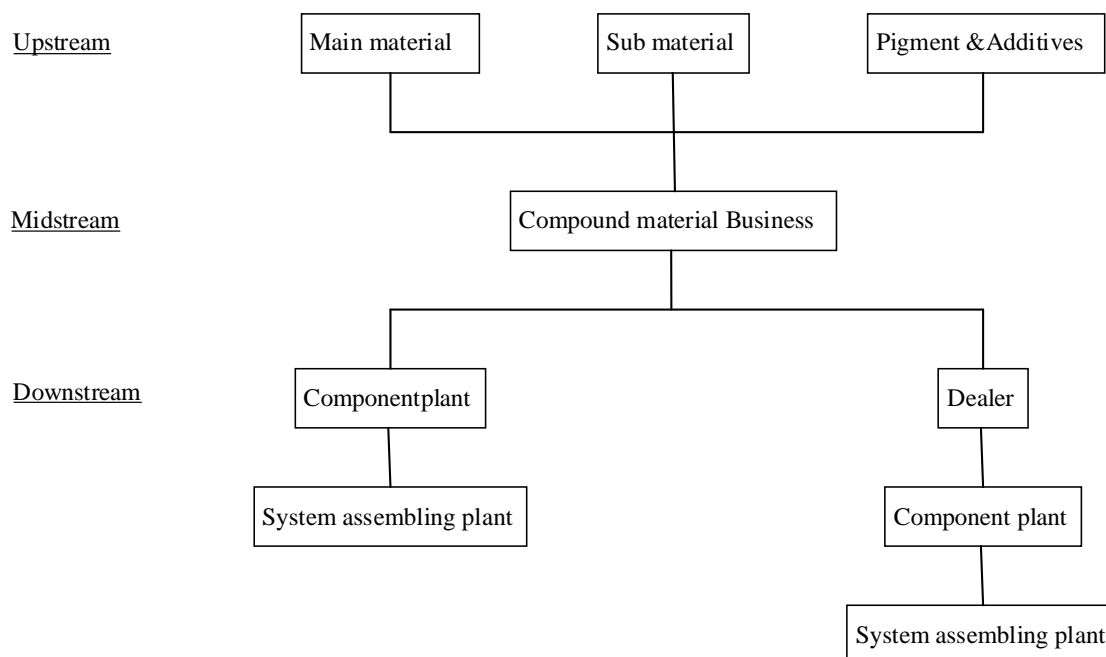

1-4. The relationship between the upstream, midstream and downstream of the industry:

(1) The relationship between the upstream, midstream and downstream of the Equipment. Business Department is as below:

Pontex occupies a key position in the midstream of the industry, connecting upstream like raw material and material factories and downstream like assembling factories. Most of the required plastics, rubber and other materials are still imported from abroad. The company then uses capabilities of precision mold development to produce high-performance components, supply downstream customers including major shoe assembling factories and serve specific international well-known manufacturers such as NIKE, CROCS, etc. Therefore, the industry has a very close relationship between the upstream, midstream, and downstream.

(2) The relationship between the upstream, midstream and downstream of the compound material business department as below:

The upstream raw materials of engineering plastic compound materials include PC, PP, NYLON, PBT, ABS, and other plastic raw materials. The downstream uses are extensive, including various 3C industries, sports equipment, medical equipment, automobiles, hand tools, furniture, etc.

1-5. Product development trends and competition

(1) Equipment business department

(A) A key role in the trend of international professional teamwork

Due to the consideration of professional teamwork and production cost, the internationally wellknown shoe factories have almost handed over the production to the Asian supply system. The factories are only responsible for designing the new product and the marketing and advertising of merchandise. Since domestic footwear manufacturing has matured in plastic material technology and mold making, which could compete with international competitors. The Company is not only an OEM factory for international brands but has even played an important role in ODM. Over the years, Taiwan has always been the most important part of global footwear manufacturing. The company takes advantage of external resources from industry, government, and academia to learn product innovation and the latest technology to occupy a place in the market.

(B) Industrial upgrading changes after the production base moved out

Due to the increase in labor and costs of management and sales, most domestic Footwear manufacturing has shifted its production to China and Southeast Asian countries. Based on its substantial experience in production and management in domestic, the company has successfully relocated its production bases. Meanwhile, the Company transforms and upgrades Taiwan as a global operation headquarters and development and design center and continues

to strengthen competitiveness in industrial strategy and technology. The Company also uses external resources to increase the overall production capacity of molds and production. Additionally, the company enhances cross-strait teamwork, promotes resource integration, and maximizes effectiveness.

(C) Based on the key element in the international supply chain system

To control quality and reputation, international brand manufacturers have always strongly led products, from development and design, material selection, components planning, production, and manufacturing, to distribution and sales. Due to the current globalized professional teamwork, all companies entering the supply chain are requested to meet the best efficiency standards and invest in sufficient equipment capacity to cooperate. Therefore, the manufacturer which has accumulated good cooperative relations and reliability will obtain the most favorable position, and then establish an important relationship of stability and reliability.

(D) The ability to significantly shorten the production cycle to respond to the trend of rapid competition. In response to the rapid demands of global consumers for new products and the continuous challenges of competitors' new products, the design, mass production, distribution, and marketing which take 6 to 12 months for a new pair of sneakers in the past is no longer aligned with the market. This situation means that only professional manufacturers with a high degree of computerization, automation, and substantial experience and technology could undertake at least 1/2 shorter delivery than in the past and can maintain high-quality output.

(E) The teamwork integrated mode of designing in Taiwan and producing overseas

Taiwan has strong technical advantages in product design and mold development in the front-end process of footwear manufacturing. With this competitive advantage, Taiwan has developed a separate direction from China and Southeast Asia in recent years. Countries such as China and Southeast Asia, which have the advantages of relatively low land and labor cost, attract most downstream, system operators, and midstream, injection processing factories, to move their production lines to these regions, leading to an excellent model of teamwork which develop, design, and service in Taiwan, massively produce overseas and enhance Taiwan's OEM status around the globe. The Company cultivates talents with excellent management and technology to enhance competitiveness.

(F) Take advantage of the economic scale to achieve the competences of reducing cost

With the shortening of the production cycle, and after consumers' consciousness about the quick replacement of the new product, meanwhile, due to the impact of the economic depression, the sales of the expensive sneaker have declined. Under the premise of being unwilling to reduce profit, the company turns to asking suppliers to cut prices. Therefore, seeking production capacity with an economic scale and sharing more management and sales costs have become the way for suppliers to survive and compete.

(2) Compound material business department

(A) Modularize the development and manufacturing of the single product, in addition to holding the market share and improving product profitability.

(B) Integrate technological innovation and possess comprehensive technical service capabilities, which equip more competitive advantages.

- (C) In response to the diversification of customers, the special processing of materials, and the demand for injection products, the company provides vertically integrated. services from mold design, injection molding, and post-processing of finished products.
- (D) The demand for products with special specifications will increase. Through diverse and customized product development, the company will strive for market competitive. advantages.
- (E) Develop lightweight alternative materials and the application of eco-friendly recycled materials,aligned with market new trends.

1-6.Overview of technology and research and development:

1. The invested research and development expense

Unit: NT\$ thousands

Item \ Year	2023	2024
R&D Expense	11,728	22,781

Data resource: Financial report verified by CPA in recent two years.

2. Successfully developed technology or commodity

Year	Product	Development Item	Counseling Unit
1999	Development of polyamide or Continuous Mixing Process for EVA	Improve the foaming degree of ultra-light compound materials, so that the density after foaming is less than 0.34g/cm ² , and can increase the durability (up to 150mm,DIN535-16).	Plastics Industry Development Center Independent research and development
1999	Advanced development technology of Elastomer polarization	Evaluation of SEBS, the proportion of grafting achieved 1% wt to increase itsvreactivity and improve the adhesivestrength or intermolecular force.	Plastics Industry Development Center
1999	Light weighting of thermoplastic polyurethane (TPU)	Maintain stability at high temperatures reduce the density from 1.2g/cm ³ to 0.6~0.82g/cm ³ and maintain the original physical properties.	Plastics Industry Development Center
2005	The processing and application of comfortable material	Applied for the outsole of soccer boots of NIKE and entered the promotion period in October 2005.	Independent research and development
2005	Fastener components interior part compound material for automobile	The company mainly aligns with the lightweight trend of the automobile and motorcycle industry in the future. The developed compound materials have the characteristics of high rigidity, high fluidity, high impact, and recyclability. This not only improves the safety factor	Independent research and development

Year	Product	Development Item	Counseling Unit
		of The original plastic, reduces future energy consumption but also contributes to environmental protection.	
2007	Compound design of outsole studs	The outsole of NIKE football shoes has a hybrid high-efficiency design of shoe spikes and shoe studs, which can prolong the useful life and reduce the consumption of earth resources, which aligns with environmental protection benefits.	Independent research and development
2007	High-functional ecofriendly compound material	Applied for the industry of sport and casual products in 96.8.	Independent research and development
2008	High rigidity, high intensity nylon compound material	Apply for electronic device components.	Independent research and development
2010	Recyclable green ecofriendly compound material	Apply for office equipment.	Independent research and development
2010	Recyclable green ecofriendly compound material	Apply for 3C products.	Independent research and development
2011	Development of nylon hydrolytic compound	For the problem of degradation of nylon after absorbing moisture, the Company conducts the development of compound materials to improve the advantages of high mechanical strength, high dimensional stability, and resistance to high temperature and high humidity environments. It could be applied to radiator tanks, etc. in the automobile radiator parts market.	Independent research and development
2011	Eco-friendly non Halogen Free flame retardant TPU material	Applied for solar PV wire insulation material.	Independent research and development
2011	Halogen Free flame retardant TPU material	Development of TPU Halogen Free flame retardant material UL-94 1/16" V-O completed.	Independent research and development
2011	Heat resistant PLA biomass material	Apply for food container. °	Independent research and development

Year	Product	Development Item	Counseling Unit
2011	Recyclable eco-friendly compound material	Apply for daily necessities	Independent research and development
2012	Plastic Oropharyngeal Airway Guide for Emergency Intubation	Medical equipment.	Plastics Industry Development Center
2012	Eco-friendly woodplastic material	Wood-plastic building material.	Plastics Industry Development Center
2013	High rigidity nylon compound material	Electronic tool material	Independent research and development
2013	Heat resistant nylon compound material	Electrical connector material	Independent research and development
2014	Low float fiber nylon compound material	Applied for the case of headlight material.	Independent research and development
2014	Development of advanced nylon waterresistant compound material	Integrate specifications to seize the market share of automobile radiator parts.	Independent research and development
2015	Nylon mineral fiber compound material	Electroplatable material for car headlight housing.	Independent research and development
2015	Advanced heat resistant biodegradable material	Disposable heat resistant tableware material	Independent research and development
2016	Recycled PET development plan	Useable in various parts of shoes.	Independent research and development
2016	Development of weather resistance TPU	Wearable device	Independent research and development
2017	Development of electroplatable high specific gravity plastic	Bathroom accessories	Independent research and development
2017	Development plan of eco-friendly utensils with recycled bamboo and wheat powder.	Tableware (knife, fork, spoon) °	Independent research and development
2018	Development of high density	Cosmetic box	Independent research

Year	Product	Development Item	Counseling Unit
	polypropylene		and development
2018	Development of shell pattern material.	Cosmetic box	Independent research and development
2018	Conductive PC carrier tape	Tray	Independent research and development
2019	Development of weather resistance ecofriendly PP	The case of motorcycles.	Cooperate with customers development
2019	Development of low moisture absorption nylon grill	low moisture absorption nylon 66 grill for the truck. °	Customer's development
2020	Seat of light rail in USA standard	Must comply with fireworks safety regulations.	Customer's development
2020	Development of extruded compound material for luggage board with infrared resistance.	Extruded PC/PBT compound material with infrared resistance for luggage board.	Customer's development
2021	High-end nylon-ppa poly-phenylene amide.	Flame-retardant Nylon 9T/10T reinforced with fiber for connectors and capacitor bases.	Independent research and development
2021	Biomass material PA56 and PCR certified ecofriendly material	Introduce original material in response to net zero emission in the future.	Independent research and development
2022	Wafer transport carrier	HDPE+ CNT (Carbon nanotubes)	Customer's development
2022	Biodegradable ecofriendly container made from sugarcane bagasse	PLA-free, eco-friendly biodegradable container	Customer's development
2023	Reinforced Automotive Parts with Glass Fiber of PCR Ecofriendly PP.	Successfully developed automotive components with PCR ecofriendly of PP material to meet the property requirements	Customer's development
2023	High-valued anti-static product PEI with CNT.	Apply for sockets in semi-conductor workshops.	Customer's development
2023	Recycle fiber hot-pressing board	Appyly for decoration and construction materials	Independent research and development
2024	Smart Cockpit & ADAS Driver Assistance	Electric vehicle interiors require near-infrared (NIR) transmission functionality and sensor cameras. Suitable NIR-packaging materials	Customer's development

Year	Product	Development Item	Counseling Unit
		include PBT+30% glass fiber (GF).	
2024	Low-Altitude Aircraft (eVTOL)	High-rigidity, low-moisture-absorption materials combined with low-carbon GRS-certified recycled carbon fiber solutions such as MXD6 + rCF, PPS, PA9T, and HTN + rCF.	Cooperate with customers development
2024	Semiconductor Peripheral Transparent Carrier Boxes	Utilizes transparent ABS, PS, or PC in combination with conductive materials to achieve transparent anti-static functionality.	Cooperate with customers development

4. Long-term and short-term business development plan:

(1) Short-term:

A. Business:

- Strengthen the business development function of the enterprise, actively develop new customers, and spread business risks.
- Provide comprehensive technical and service capabilities to maintain the company's existing competitiveness.
- Strengthen customer relationship management and provide differentiated product and service value.
- Establish a strong cross-departmental business team for the business, research and development, and quality assurance, actively striving for business opportunities for. Strategic alliances.

B. Product research and development:

- Recycled modified PET eco-friendly material.
- Weather resistance TPU material.
- Metalloids high-density plastic materials.
- Biodegradable eco-friendly tableware material.
- High specification engineering plastic material.

C. Production:

- Improve process quality and increase yield.
- Strengthen the production and sales cooperation mechanism to ensure meeting the quality and delivery requirements of customers.
- Improve the quality of personnel, reduce the turnover rate, and maintain the technical experience.
- Introduce robotic arms to improve production capacity and quality stability.

D. Operation Planning:

- Strengthen the teamwork with overseas factories, promote the integration of resources, and use the overall capabilities of the group to maximize its effectiveness.
- Use core technical capabilities to develop overall business strategies.
- Establish an international ERP and e-commerce system to effectively manage the operating

performance of overseas bases.

- d. Cultivate R&D, technology, business professional, and management talents to improve operational performance.

(2) Long-term:

A. Business:

- a. Analyze products' international fashion trends, develop new products or extended products, and arrange multiple marketing channels layout.
- b. Construct a global logistics and teamwork integration system to establish a more stable marketing channel.
- c. Improve business development capabilities and move toward profession and internationalization.
- d. Strategic alliance with customers to develop niche markets and establish a marketing system.
- e. Actively contact various types of brands, and expand the business scope, including trade business model.

B. Research and development:

- a. Develop eco-friendly and recyclable plastic materials, reduce plastic incineration, save energy and reduce carbon.
- b. Development of wearable weather resistance and anti-sensitivity plastic materials.
- c. Development of metalloids high-density plastic series products.

C. Production:

- a. Cooperate with the company's marketing goals and technology development and introduce the latest production management technology.
- b. Continuously improve the production process, increase the yield rate, reduce internal costs, and create profits.
- c. Use the external resources of industry, government, and academia to learn product innovation and the latest technology in the world.
- d. Introduce production technology from other industries and apply it to existing products to increase value.
- e. Gradually upgrade automatic production technology and equipment.

D. Operation Planning:

- a. Cooperate with the company's long-term and short-term planning, take advantage of the capital market to raise funds, and attract more funds and talents to achieve the company's sustainable operation goal.
- b. Integrate the company's resources, strengthen the layout of the global production and sales capabilities of each business division, and expand the company's operations and niche scale.
- c. Strengthen core technical capabilities, integrate upstream and downstream key technologies, enter the supply chain of well-known brands, and establish competitiveness.
- d. Assess the feasibility of investing in future trend industries, such as energy, environmental protection, and regeneration industries.

2、MARKET AND PRODUCTION AND SALES OVERVIEW

1 .Market Overview

(1).Sales (Service)Reigon.

Unit: NT\$ thousands

Year Reigon		2022		2023		2024	
		Sales Amount	%	Sales Amount	%	Sales Amount	%
Domestic		332,982	35.18	324,965	54.68	272,885	49.33
Export Sales	Asia	351,477	37.14	140,477	23.64	163,282	29.51
	America	98,252	10.38	6,085	1.02	23,494	4.25
	Others	163,772	17.30	122,786	20.66	93,578	16.91
	subtotal	613,501	64.82	269,348	45.32	280,354	50.67
Total		946,483	100.00	594,313	100.00	553,239	100.00

(2).Market Share

1. Equipment business department

The company is one the few domestic professional factories that could integrate plastic materials, design and development, mold manufacturing, and injection molding. It is the. designated manufacturer of NIKE high-functional spikes outsole components. Additionally, the Company passed the factory inspection and certification of Under Armour and CROCS, becoming the main global production base of many brands.

2. Compound material business department

Combined with market trends, the company develops customized r-PET, eco-friendly. Recycled materials, fireproof materials, automobile materials, and 3C electronic materials, as well as self-developed electroplatable metalloids patented materials to expand its competitiveness among peers. In addition to the Taiwan factory in the global layout, it also includes setting up factories in China and Vietnam to strive for the domestic demand market of the red supply chain, Regional Comprehensive Economic Partnership(RECP), and Comprehensive and Progressive Agreement for Trans-Pacific Partnership(CPTPP) economies, rapidly expanding the global overseas market.

(3). The future supply and demand situation and growth of the market.

1. Equipment business department

- (A) Over the past 30 years, with its precision mold development technology and professional production capacity, Pontex has become an important production base in Asia. for high-functional spike outsoles of Nike and shoe injection of CROCS.
- (B) Pontex has created the greatest competitiveness for a long time with its leading technology advantages in the industry and the production process that passed the ISO9001. quality management standard.Whether it is the factory in Taiwan, China, or Vietnam, every product is guaranteed with the great commitment of Pontex to provide the highest quality service.
- (C) After the Vietnam factory joined, Pontex's engineering compound material molding capabilities of controlling the elastomers and non-elastomers compound materials, and the

capabilities of developing 3D molds and system manufacturing, the multi-point market supply chain can meet the different needs of each brand and assist the brand to establish automatic process technology, introducing popular materials and trend analysis, adding value to shoe design, and increasing the added value of shoes.

- (D) Assist the industry in the continuous development of new shapes and innovative designs to meet a small number but diverse consumption patterns. Shorten the design and process of shoe proofing, make efficient production, rationalize the process, and automated equipment to reduce costs, shorten the development time of shoe proofing, and increase brand profits.
- (E) Cooperate with the company's self-developed compound materials (high. specification materials, green r-PET materials), and provide footwear customers with more material application options, reduce costs, and provide more ideas to attract the market.
- (F) In Vietnam and China, the company produces a variety of casual shoes that are sold. worldwide for CROCS as an OEM factory and has become a major manufacturer in Asia.
- (G) In response to the emergence of China brands, Pontex has successfully won orders. from Anta, Xtep, and 361sport for mass production.
- (H) With the vigorous development of cycling around the globe, cycling shoes have become an important new footwear product. In addition to the major production. of professional sneakers outsole, the company also cooperates with PFI Shoe Factory in China to develop clipless road bike outsoles for the Italian bicycle brand, Fi'zi:k, and produce bicycle shoe outsoles for Northwave, which are sold all over the world to provide more high-quality product choices to cycling enthusiasts.

2 Compound material business department

The Company's R&D Center remains committed to the modification of composite materials and the recycling and reuse of raw materials, aiming to enhance both composite material technology and mass production capabilities. Our long-term goal is to become a leading green material R&D center and a professional supplier of eco-friendly materials in Asia. The Company's sustainability efforts are guided by five core principles: energy conservation, resource efficiency, elimination of hazardous substances, recycling and reuse, and carbon reduction.

Thanks to their outstanding characteristics—including lightweight, high strength, design flexibility, weather resistance, and corrosion resistance—composite materials are widely used in a variety of industries, such as automotive, marine, construction, electronics, electrical appliances, sports and leisure, and industrial and civil engineering.

Globally, the consumption of engineering plastics is roughly distributed as follows:

Automotive and related industries: 40%

Agriculture and machinery: 30%

Daily-use products: 20%

Electrical and electronics: 10%

As compound material technologies continue to improve, the pursuit of lightweight, thin, compact, and miniaturized solutions is gradually replacing traditional metal applications. In addition, the recyclability and environmental benefits of these materials have prompted industry players to demand that upstream suppliers actively develop sustainable materials. This, in turn, is driving engineering plastic manufacturers to strengthen their investment in R&D, production, and sustainable supply chains.

In recent years, the rapid growth of the electronics industry has spurred a wave of computer replacements, which is expected to sustain the rising demand for plastics in electronic applications. Moreover, the projected growth of the Asian automotive and motorcycle markets, along with the continued expansion of the mainland China market, indicates a promising outlook for the engineering plastics industry.

In response to the increasing demand for environmentally friendly materials and the need to submit relevant recycling certifications to meet business development goals, the Company began participating in the Global Recycled Standard (GRS) certification counseling program. In October 2020, the Company obtained the GRS certification. Furthermore, in December 2020, nine products were certified for Post-Consumer Recycled (PCR) content. In 2022, two additional products passed the PCR certification, and by 2024, the Company had a total of 13 PCR-certified products.

4. Competitiveness

Businss Unit	Competitiveness
Equipment business department	1. The liability of long-term cooperation with international well-known factories
	2. Complete the automatic production of manufacturing equipment and fast supply capabilities.
	3.Comprehensive factory from the design to material compounding, precision mold making, and injection assembly.
	4. Effective cost management to control the economy scale.
Compound material business department	1. Equip with the ability to develop functional plastic compound materials, which is one of the core technologies of Pontex.
	2. Equip with the ability to assist customers in improving and solving problems in processing and mold development.
	3. The color matching and secondary processing ability of engineering plastics are strong, and the speed and quality are better than the company in the same industry.
	4. Combine the company's internal and external system resources to provide customers with more diverse added value and enhance customers' market competitiveness.

5. Favorable and Unfavorable Factors in the Long Term:

(A)Opportunity

- The development of the global sports industry continues to grow year, although it might be effected by the economic cycles, it remains stable for long-term demand-driven market.
- The flourishing development of China's sports industry will help the growth of international brands and well-known Chinese brands.
- Close cooperation between industry and academia. The mature production. technology in the domestic industry has won the trust of foreign customers.
- Early deployment of the Vietnam factory to obtain cooperation opportunities. with international customers.
- The trends of compound plastic products focusing on environmental protection and being

green.

- f. Possess a good R&D team and production capacity.
- g. VietNam Pontex equipment and compound materials have developed rapidly, striving for regional economic advantages such as CPTPP in the future.

(B)Threat

- a. The domestic and foreign overall industrial technology continuously improves, and more competitors who want to invest increase.
- b. The production continues to move abroad, and foreign management risks are relatively higher.
- c. Equipment customers continue to move out. The nearby supply is gradually becoming a trend.
- d. The higher the quality requirements of compound materials, the faster the research and development must be.
- e. The price of oil and raw materials fluctuated violently, and the profits were squeezed.
- f. Due to the low-price competition in the industry, the move out downstream is becoming more common.

(C)Strength

- a. Professional technology has been recognized internationally.
- b. Equip with the capability of comprehensive vertical integration.
- c. Equip with the capability of engineering plastic materials, mold, and injection processing, and develop vertical integration capabilities.
- d. Injection technology and raw material color-matching technology are the best in the industry and are recognized by customers.
- e. The service system and initiative are excellent. The response and speed to solve problems are flexible.
- f. All relevant internal technologies could be supported mutually which solves problems efficiently.
- g. The equipment and compound materials could be produced by factories in China and Vietnam in the future to directly serve domestic demand in China and the international market.

(D)Weakness

- a. Major international brands are mutually exclusive; therefore, it is difficult to strive for orders simultaneously.
- b. Excessive reliance on a small number of major customers but an insufficient number of major customers.
- c. Insufficient innovation capability. The capability and experience of the R&D/Sales team need to be strengthened.
- d. Raw material prices continue to make new highs which reduces the profits.

6. The coping strategy against unfavorable factors:

(A)Equipment business department:

- a. Continuously improve service quality and efficiency to strengthen customer stability.
- b. Continuously improve the added value of the new product and material development to strengthen the customers' dependency on the Company.
- c. Strengthen the management of the raw material. Quickly grasp price fluctuations and strive for the most favorable cost.
- d. Use injection technology to develop new products and business opportunities in related industries.
- e. Introduce automatic equipment such as robotic arms to improve delivery capabilities and competitiveness.
- f. Introduce external information and resources to strengthen the personnel with professional technology.

(B) Compound material business department:

- a. Collect the information and technologies which are popular in the market. Align with the trend of the future market, invest in research and development of the materials of future trend, and seize the market:
 - (a) Green eco-friendly materials: recyclable ABS, PET, 3C eco-friendly electronic packaging materials, biodegradable materials, food packaging materials, electric equipment packaging materials.....etc.
 - (b) Develop high thermal conductivity materials to meet the demand of heat conduction plastic materials of LEDs, computer CPUs, automobiles, or other mechanical equipment to replace metals.
 - (c) Develop high rigidity, high heat resistance NB tablet case to respond to the thinner case market.
- b. Research and develop high-tech, high-standard, patented products, and gradually eliminate low-tech and unprofitable products.
- c. Strengthen the ability to produce customized products and provide suitable products with appropriate quality and quantity in time to win the trust of customers, consolidate the source of customers, and obtain profits.
- d. Combine suppliers, strategic alliances manufacturers in the same industry, and downstream customers to do vertical integration to provide comprehensive services, develop new customers to increase revenue, and create higher added value.
- e. Take advantage of Vietnam Pontex's competition conditions which meet the requirement of CPTPP preferential tariff and attract international customers for cooperation.

7 MAJOR PRODUCTS AND THEIR PRODUCTION PROCESSES

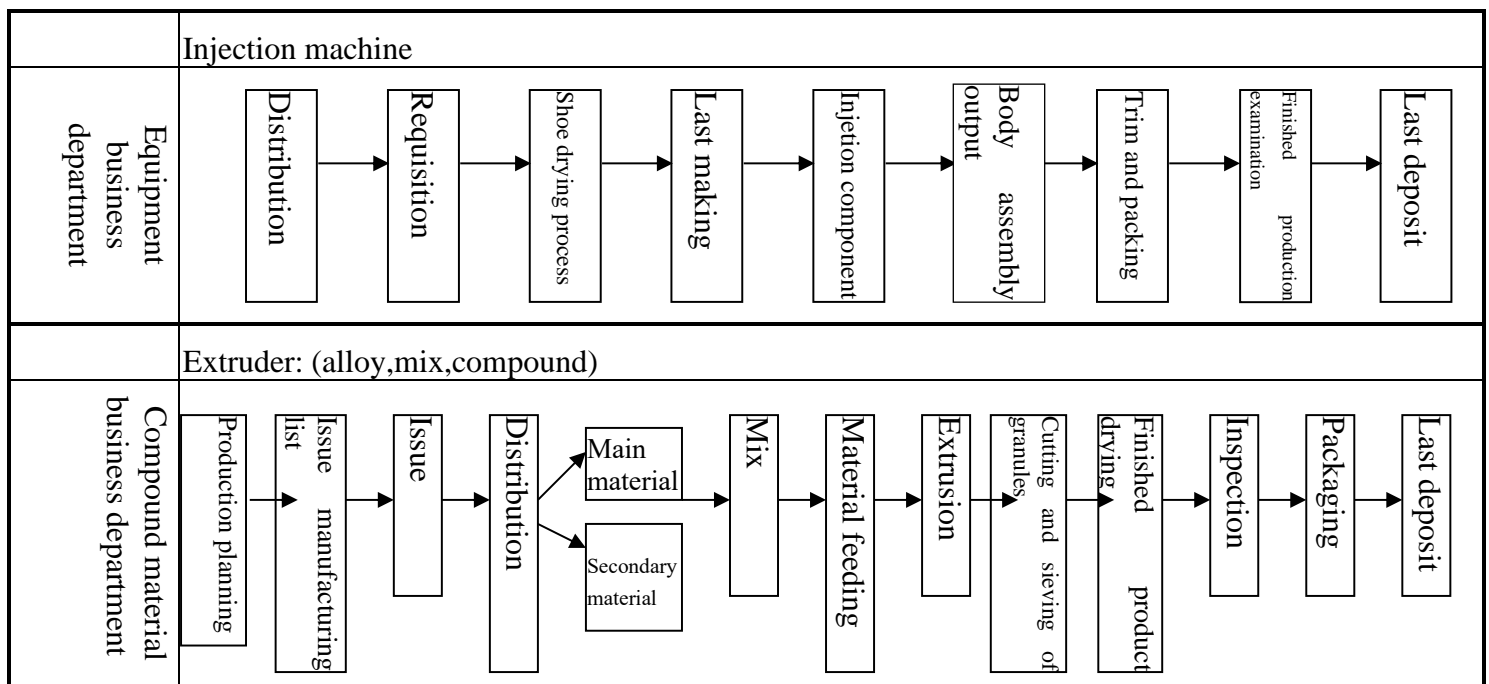

(1) Major Products and Their Main Uses

Major Product	Important Uses
Equipment business department	All kinds of sports equipment component injection and casual shoe injection produced by the company are multi-color, multi-material, high-functioning, and high intensity products, which are provided for downstream system assembly plants to assemble.

Major Product	Important Uses
Compound material business department	<p>The PC series is used to manufacture domestic appliances, automobile components, medical equipment, communication equipment and other components, and electronic products. The PA series is suitable for agricultural machinery components, connectors, hand tools, electrical appliances, electric tools, radiators, automobile lampshades, etc. The PP series is suitable for the manufacture of automobile interior and exterior components, machine tool components, and automobile door panels. The PCABS series can be used for the manufacture of camera cases, toys, automobile dashboards, splitters, and other information products.</p> <p>The PLA series is suitable for BB shots, packaging materials, tableware, daily necessities, and other eco-friendly consumables.</p>

(2) The manufacturing process of major products:

Equipment business department, compound material business department

(3) Supply Status of Main Materials Equipment injection components and engineering plastic compound. materials

Major Raw Material	Source of Supply	Supply situation
TPU	Datong/San Huang	Normal
PP	FCFC (Formosa Chemicals & Fibre Corporation)/Hong Sheng/Chun Yi/Cheng Ken/Huai Ji/Hong Ju/Chuan Liu Liu/Chi Feng/Li Tai	Normal
PC 、 PS	Chimei/ FCFC-Idemitsu/FCFC (Formosa Chemicals & Fibre Corporation)/ Zhan Xin/Hai Ping/ Gao Fu	Normal

Major Raw Material	Source of Supply	Supply situation
NYLON	Li Peng/Li Lin/Hou Rong/Grand Pacific Petrochemical Corp. (GPPC)/Hong Ji/ Zhang Cheng/Cheng Ken/Far Eastern New Century Corporation/Sheng Ying/Qin Ji/De Geng/Fu Li Yi Yuan Cheng	Normal

(4)A list of any suppliers and clients accounting for 10 percent or more of the company's total procurement (sales) amount in either of the 2 most recent fiscal years, the amounts bought from (sold to) each, the percentage of total procurement (sales) accounted for by each, and an explanation of the reason for increases or decreases in the following figures.

(4)-(1). The main supplier information in the recent two years and up to the publication date of the annual report:

	2024				2023			
Item	Company Name	Amount	Percent(%)	Relation with Issuer	Company Name	Amount	Percent(%)	Relation with Issuer
	Qi Ping	40,857	10.55					
	Others	346,353	89.45		Others	334,404	100.00	
	Net Total Supplies	387,210	100.00		Net Total Supplies	334,404	100.00	

Note1: A list of any suppliers and clients accounting for 10 percent or more. of the company's total. procurement (sales) amount in either of the 2 most recent fiscal years, the amounts bought from (sold to) each, the percentage of total procurement (sales) accounted for by each, and an explanation of the reason for increases or decreases in the above figures. Where the company is prohibited by contract from revealing the name of a client, or where a trading counterpart is an individual person who is not a related party, it may use a code in place of the actual name.

Note2: Up to the date of publication of the annual report, if a company that is. listed or whose shares have been. traded in a Securities Trading on the Taipei Exchange has the latest financial information that has been audited, certified, or reviewed by CPA, it shall also disclose it.

The Company's customers are dispersed and stable. Pontex could maintain a good cooperative relationship with customers, strive to deepen the core technology and develop new products and new markets to reduce the risk of customer concentration.

Compared with 2024, the proportion of ratio of net sales in 2023 decreased, mainly due to the decrease

orders.

(5) Production in the Last Two Years:

	2023				2024			
Item	Customer	Amount	Percent	Relation to Pontex	Customer	Amount	Percent	Relation to Pontex
					CROHAN	64,711	11.70	None
	Others	594,313	100.00		Others	488,528	88.30	
	NetTotal Supplies	594,313	100.00		NetTotal Supplies	553,239	100.00	

Note1: Setting forth the names of any clients that have sold 10 percent or more of the. company's sales in either of the preceding 2 fiscal years, and the monetary amount and the proportion of such sales as a percentage of total sales, and explaining the reason for any change in the amount; provided owever, that Where the company is prohibited by contract from revealing the name of a trading counterpart, or where a trading counterpart is an individual person who is not a related party, a code may be used in place of such trading counterpart's actual name.

Note2: Up to the date of publication of the annual report, if a company that is listed or whose. shares have been traded in a Securities Trading on the Taipei Exchange has the latest financial information that has been audited, certified, or reviewed by CPA, it shall also disclose it.

The Company's customers are dispersed and stable. Pontex could maintain a good cooperative relationship with customers, strive to deepen the core technology and develop new products and new markets to reduce the risk of customer concentration.

Compared with 2024, the proportion of ratio of net sales in 2023 decreased, mainly due to the decrease orders.

3、THE NUMBER OF EMPLOYEES EMPLOYED FOR THE 2 MOST RECENT FISCAL YEARS, AND DURING THE CURRENT FISCAL YEAR UP TO THE DATE OF PUBLICATION OF THE ANNUAL REPORT, THEIR AVERAGE YEARS OF SERVICE, AVERAGE AGE, AND EDUCATION LEVELS:

The employee's information up to the publication date of annual report in recent two years.
(Headquarter) Pontex Polyblend Co., Ltd.

4、ENVIRONMENTAL PROTECTION EXPENDITURES:

For the most recent year and up to the publication date of the annual report, disclose any losses resulting from environmental pollution (including compensation payments and violations found during environmental protection inspections). This should include the date of penalty, penalty reference number, violated regulations, details of the violation, and penalty content. Also disclose the estimated current and potential future expenditures and response measures. If a reasonable estimate cannot be made, explain the reason why it cannot be reasonably estimated.

In a routine inspection conducted by the Environmental Protection Bureau of Taichung City in June 2020 (Year 109 of the ROC calendar), it was determined that the actual condition of the company's factory premises did not fully comply with the originally approved Environmental Impact Statement. A minimum fine of NT\$300,000 was imposed. On December 15, 2020, the company signed a contract with Dali Environmental Technology Co., Ltd. to handle the application for the modification of the Environmental Impact Assessment (EIA), with a contract amount of NT\$3.5 million (excluding tax).

Following the first preliminary review meeting convened by the Environmental Protection Bureau of

Taichung City on December 15, 2021 (Year 110), and in response to the meeting's documentation requirements, the company signed another contract in February 2022 (Year 111) with Hong Yi Engineering Consulting Co., Ltd. to conduct a revised soil and water conservation plan, with a contract value of NT\$1.1 million (excluding tax). Additionally, in July 2022, in compliance with the documentation requirements of the conservation plan, the company commissioned Dakuan Engineering Co., Ltd. to conduct drilling operations in a geologically sensitive area, with a contract amount of NT\$830,000 (excluding tax).

The most recent meeting for this EIA modification application was the fourth preliminary review meeting convened by the Taichung City Environmental Protection Bureau on March 6, 2025 (Year 114). According to the meeting minutes, the company is required to compile and respond to the reviewers' comments by June 6, 2025. A new review meeting will be arranged upon resubmission. As of the date of this annual report, no new review meeting has been conducted. Any additional expenditures arising in the future will be budgeted as needed.

5、LABOR RELATIONS:

1. List any employee benefit plans, continuing education, training, retirement systems, and the status of their implementation, and the status of labor-management agreements and measures for preserving employees' rights and interests:

(1) Employee Welfare

The Company budgets a detailed welfare every year. In addition to the labor insurance, and health insurance by law, Group personal accident insurance, overseas travel insurance, etc. are added. Furthermore, the Company also provides uniforms, meal subsidies, regular physical examinations, free parking spaces, etc.

Additionally, the Company established an employee welfare committee. The company allocates employee welfare funds to handle various employee welfare affairs. The affairs handled by the committee include weddings, funerals, celebrations, injuries, illnesses and childbirth, emergency assistance, travel, birthday celebrations, Labor Day, the year-end banquet of the Mid-Autumn Festival, recognition of model employees and employees with certain service years, cultural and recreational activities and other welfares.

(2) Employee continuing education and training

To improve the quality of colleagues, the constitution of the company, work efficiency and quality, etc., the Company has formulated the "Regulations of education and training management". The education and training are led by the human resources, who are responsible for compiling various education and training needs and policies of all departments of the company and assisting in the implementation of internal or external education and training.

(Headquarter) Pontex Polyblend Co., Ltd. employee continuing education and training
Employee continuing education and training

Item	Number of classes	Number of people	Total hours	Total expense (NT\$)

1. Rookie training	0	0	0	0
2. Professional competency training	0	0	0	0
3. Self-inspiration training	0	0	0	0
Total	0	0	0	0

(3) Retirement system and implementation

Since the implementation of the "Labor Pension Act" on 1 July 2005, for employees who are covered by the retirement mechanism in the Labor Standards Act and reserve their seniority prior to the application of the Act. The employee retirement management measures were formulated according to the Labor Standards Act, and the approved establishment of the Supervisory Committee of Business Entities' Labor Retirement Reserve is to supervise retirement reserve related matters. And since January 1993, the the Trust Department of the Bank of Taiwan. For employees who meet the retirement requirements, the Company provides retirement pensions according to the working years and the basis formulated by the Labor Standards Act. Additionally, since 1 July 2005, for the employees who chose the new system of retirement pension and the employees who worked after 1 July 2005, the Company refers to the standard, "Monthly Contribution Classification of Labor Pension ", that not lower than 6% of the employee's salary is insured and paid to the employee's personal retirement account monthly.

(4) Labor-management circumstance

The Company usually puts great emphasis on the handling of various welfare for employees, regards employees as shareholders of the company, and emphasizes bilateral communication with employees, therefore, the labor-management relationship is harmonious. The Company fully respects the opinions

of the employees. If anything is needed communication could be resolved through coordination. The labor management is in good condition.

(5) Measures related to the protection of employees' rights and interests

The Company holds regular labor-management meetings by the law and settles an employee suggestion box. The human resource unit is responsible for handling the suggestions of employees.

2. List any losses suffered by the company in the most recent fiscal year and up to the annual report publication date due to labor disputes and disclose an estimate of possible expenses that could be incurred currently and, in the future, and measures being or to be taken: None.

(1) The Company has always put great emphasis on labor relationships. If anything is needed communication could be resolved through coordination. Therefore, no major labor disputes have occurred, and no losses have been suffered.

(2) The estimated losses that might occur at present and in the future and the countermeasures:

The company will fully abide by Labor Standards Act and strengthen welfare at present, and in the future and establish interactive communication and complaint management. The company's labor-management relationship has always been rational and harmonious. There have been no major labor disputes and losses in recent years. It is estimated that the possibility of major labor disputes in the future is extremely small.

6 、 CYBER SECURITY MANAGEMENT:

Cyber security risk management

1. The company has settled an information department, with one dedicated officer and.

One dedicated personnel, who are responsible for information security control and maintaining the normal operation of the company's information system.

2. The doors and cabinets of the computer room of the Company are locked and controlled. General personnel is not allowed to enter at will. The computer room is equipped with HVAC (Heating, Ventilation, and Air Conditioning) System and is regularly inspected in the fire prevention and waterproof safety facilities.

3. The company has established a complete firewall, anti-virus software, and spam filtering system. The legally authorized software is installed on all the computers. Employees are strictly prohibited from downloading illegal software without permission. The information personnel will regularly conduct the inspections.

4. The company has a complete backup mechanism for important data. Employees need to enter personal accounts and passwords to log in when using computers. The authority of the ERP system is set up according to their job duties to control data access and modification.

5. Information personnel attend information training courses irregularly every year and promote cybersecurity awareness messages on the latest viruses and other security issues from time to time.

7、IMPORTANT CONTRACT

V、REVIEW OF FINANCIAL CONDITIONS, OPERATING RESULTS, AND RISK MANAGEMENT

1、FINANCIAL INFORMATION

(1) Condensed balance sheet and statement of comprehensive income

Unit: NT\$ thousands

Year Item	2024	2023	DIF	
			AMT	%
Current assets	590,303	627,400	(37,097)	(5.91)
Property, plant and equipment	683,976	684,583	(37,822)	(0.09)
Other non-current assets	230,434	233,548	(3,114)	(1.33)
Total assets	1,504,713	1,545,531	(40,818)	(2.64)
Current liabilities	492,042	466,416	25,626	5.49
Non-current liabilities	29,117	198,075	(168,958)	(85.30)
Other non-current liabilities-others	16,068	15,289	779	5.10
Total liabilities	537,227	679,780	(142,553)	(20.97)
Common stock	1,134,950	979,950	155,000	15.82
Retained earnings	(133,171)	(60,897)	(72,874)	(119.67)
Other components of equity	(34,293)	(53,302)	19,009	(35.66)
Total equity	967,486	865,751	101,735	11.75

Explanation:

1. The decrease in long-term liabilities and total liabilities was mainly due to the repayment of bank loans.
2. The decrease in retained earnings compared to the previous period was mainly due to

higher research and development expenses. This was caused by Bontex's participation in the "Fabric Recycling" industrial innovation R&D program during the current period, resulting in a net loss.

3. The increase in other equity was mainly due to a higher exchange difference from translating the financial statements of foreign operations compared to the same period last year. This is related to the translation of financials from RMB to TWD and VND to TWD in the consolidated financial statements. As the depreciation of VND against TWD was greater than in the same period last year, the cumulative translation adjustment recognized this period accordingly decreased.

2、FINANCIAL PERFORMANCE

Comparative Analysis of Financial Performance for the Most Recent Two Years

Unit: NT\$ thousands

Item \ Year	2024	2023	Amount of Change	Percentage of Change
Operating revenues	553,239	594,313	(41,074)	(6.91)
Operating costs	(494,676)	(526,748)	(32,072)	(6.09)
Gross profit-net	58,563	67,565	(9,002)	(13.32)
Operating expenses	(141,937)	(129,663)	12,274	9.46
Operating income(loss)	(83,374)	(62,098)	(21,276)	(34.26)
Total non-operating income and expenses	10,084	(8,154)	18,238	(250.69)
Income from continuing operations before income tax	(73,290)	(70,252)	(3,038)	(4.32)
Income tax benefit(loss)	(53)	354	(407)	(114.97)
Net income (loss)	(73,343)	(69,898)	(3,450)	(4.94)

Explanation of Variances in Percentage Change

(1) The increase in operating loss and pre-tax loss from continuing operations was mainly due to the rise in research and development expenses resulting from Bontex's participation in the "Textile Recycling" innovation and R&D project during the current period.

(2) The increase in non-operating income and expenses was mainly due to government subsidy income related to Bontex's participation in the "Textile Recycling" innovation and R&D project during the current period.

(3) The decrease in income tax benefits was primarily due to adjustments of prior year subsidiary tax estimates and the provision for corporate income tax for Bontex Vietnam.

(3)Expected Sales Volume and Basis, Potential Impact on Future Financial and Business Performance, and Response Plan

The Company's management has set sales volume targets based on current market demand conditions, development trends, and the Company's production capacity.

In terms of sales execution, the Company leverages its high-quality production and sales service capabilities, the professionalism and proactiveness of its sales team, and strong logistical support, which have together led to a high level of customer satisfaction over the years. This year, the Company will continue to stay closely attuned to market dynamics, deepen customer relationships, uphold the corporate brand image, and remain committed to meeting delivery schedules and ensuring product quality, with the goal of cultivating long-term and stable customer partnerships.

In addition, the Company will actively pursue various strategic production and sales alliances to drive revenue growth momentum, with the aim of expanding market share and enhancing corporate profitability.

3、CASH FLOW

The prospectus shall: (1) analyze and explain any changes over the most recent fiscal year in the company's cash flows; (2) describe how the company plans to address any illiquidity problems; and (3) provide an analysis of the company's cash liquidity for the coming fiscal year.

1.Cash flow analysis for the current year

Item \ Year	December 31,2024	December 31,2023	Variance
Cash Flow Ratio (%)	(0.82)	17.05	(104.81)
Cash Flow Adequacy Ratio (%)	242.39	70.81	242.31
Cash Reinvestment Ratio (%)	(0.26)	4.89	(105.32)

Analysis of financial ratio change:

- (1) The changes of the cash flow ratio and the cash reinvestment ratio are mainly due to the decrease of the net cash inflows from operating activities, resulting in the decline of both ratios.
(2) The changes of the net cash flow adequacy ratio is mainly due to the decrease in capital expenditures over the past 5 years and a decrease in the increase in inventory over the past 5 years,resulting in the increase of the net cash flow adequacy ratio.

2.Describe how the company plans to address any illiquidity problems: Not applicable.

3.Cash Flow Analysis for the Coming Year

Unit: NT\$thousands

Cash and Cash Equivalents, Beginning of Year (1)	Estimated Net Cash Flow from Operating Activities (2)	Estimated Cash Outflow (3)	Cash Surplus (Deficit) (1)+(2)-(3)	Leverage of Cash Deficit	
				Investment Plans	Financing Plans
\$114,445	\$801,759	\$947,310	\$(31,106)	\$-	\$150,000

4 、 THE ANNUAL REPORT SHALL DESCRIBE THE EFFECT UPON FINANCIAL OPERATIONS OF ANY MAJOR CAPITAL EXPENDITURES DURING THE MOST RECENT FISCAL YEAR: NONE.

5 、 The Annual Report Shall Describe the Company's Reinvestment Policy for the Most Recent Fiscal Year, the Main Reasons for the Profits/Losses Generated Thereby, the Plan for Improving Re-Investment Profitability, and Investment Plans for the Coming Year: None.

6 、 Risks

The section on risks shall analyze and assess the following matters during the most recent fiscal year and as they stood on the date of publication of the annual report:

6.1 Effects of Changes in Interest Rates, Foreign Exchange Rates and Inflation on Corporate Finance, and Future Response Measures:

Unit: NT\$thousands

Item	The effect on the company's profits(losses)		Future response measures
	2024	2023	
Interest revenue	2,206	2,256	None
Interest expense	14,116	20,383	The company will adjust the selling price appropriately depending on the changes in market interest rates and exchange rate
Foreign exchange gains (losses)	2,639	2,237	As above
Inflation	The recent changes in inflation have not significantly affected the company's operations, and have no significant impact on the company's profit and loss.		The company will continue to carefully observe changes in the price index to reduce the losses.

6.2 Policies, Main Causes of Gain or Loss and Future Response Measures with Respect to High-risk, Highleveraged Investments, Lending or Endorsement Guarantees, and. Derivatives Transactions

The Company does not have behavior as high-risk investments, highly leveraged investments, loans to other parrties, endorsements, guarantees, and derivatives transactions.

All are handled according to the policies and countermeasures formulated in the Company's "Procedure Governing the Acquisition and Disposal of Assets", "Tackling Procedure of Derivatives", "Procedure Governing Loaning of Funds" and "Regulations Governing Making of Endorsements/Guarantees".

6.3 Future Research & Development Projects and Corresponding Budget

The research and development strategy takes market competitiveness and high-quality products as the core. With the goal of environmental protection recycled PCR certification and zero carbon emissions in the future, the products will be used in commodities with the concept of the circular economy in the 3C industry, transportation industry, LED industry, sports equipment, biodegradable, bathroom hardware, household products, and green energy power generation. Additionally, the high-class material applications are mainly heat-resistant, aging-resistant, and low-moisture-absorption, such as mobile phone camera module connectors, capacitors, and bicycle transmissions which are durable and shockproof to possess the market share of high-class components.

Unit : NT \$ thousands

Research Projects	Completion(%)	Expected Research Expenditure	Expected Completion Schedule	Major Risk Factor
Smart Cockpit & ADAS Driver Assistance	Electric vehicles are equipped with 11 camera modules to enhance safety. To prevent water ingress and ensure dimensional stability of the lenses, Polybutylene Terephthalate (PBT) is used due to its excellent water resistance and mechanical stability.	NT\$ 200 million	June 2025	For component packaging, low-energy Near Infrared (NIR) laser welding is required. Therefore, materials must exhibit transmittance at NIR wavelengths to enable efficient sealing.
Low-Altitude Aircraft (eVTOL)	Material development starts from agricultural drone (UAV) wings, focusing on confirming material properties and transparency.	NT\$ 300 million	August 2025	Material rigidity and wear resistance must support long service life. Fatigue performance should be comparable to aluminum alloy, ensuring reliability in structural applications.
Semiconductor Peripheral Transparent Carrier Boxes	Verification of material properties and optical transparency	NT\$ 500 million	June 2025	Ensure material transparency, cleanliness, and compliance with relevant certifications

Effects of and Response to Changes in Policies and Regulations Relating to. Corporate Finance and Sales: None.

Effects of and Response to Changes in Technology and the Industry Relating to. Corporate Finance and Sales: None.

6.4 The Impact of Changes in Corporate Image on Corporate Risk Management, and the Company's Response Measures: The company has always adhered to the operating principles with professionalism, integrity and emphasizes the corporate image and risk control. Currently, there is no foreseeable crisis.

6.5 Expected Benefits from, Risks Relating to and Response to Merger and Acquisition. Plans: None.

6.6 Expected Benefits from, Risks Relating to and Response to Factory Expansion Plans: None.

6.7 Risks Relating to and Response to Excessive Concentration of Purchasing Sources, and Excessive Customer Concentration: None.

6.8 Effects of, Risks Relating to and Response to Large Share Transfers or Changes in Shareholdings by Directors, Supervisors, or Shareholders with Shareholdings of over 10%:

The company's equity is dispersed, and there is no concentration of shareholding, so the risk of large-scale transfer of equity is not high.

6.9 Effects of, Risks Relating to and Response to the Changes in Management Rights: None.

6.10 In July 2016, the Securities and Futures Investor Protection Centre (hereinafter, referred to as the "SFIPC") filed a class action lawsuit on behalf of the Company's investors against the Company's former Chairman for his unauthorized investment in Suzhou Shangbang Optoelectronics Co., Ltd. without the approval of the Board of Directors, on the ground that the financial statements for the period from the fourth quarter of 2010 to the second quarter of 2012 were false and omitted and claimed for the Company for joint and several liability. According to the Company's assessment, the investment in Shangbang Co. was a personal wrongdoing of the former chairman in breach of his appointment and there were no false and omission in the financial statements. Given that Shangbang was not invested by the Company, the basis of the claim against the Company did not exist. The lawsuit was dismissed by the Taiwan Taichung District Court on 25 October 2018, which ruled against the SFIPC. However, the SFIPC filed an appeal on 26 December 2018, and on 27 May 2020, the Taiwan High Court Taichung Branch Court ruled that the Company and the other appellees were liable for a compensation. On 16 June 2020, the Company's attorney filed an appeal to the Taiwan High Court against the ruling of the second trial. The Supreme Court ruled on November 15, 2023 reversed the judgment of the original second trial, which held the Company and the other appellees liable for additional interest in compensation, and remanded the case to the Taiwan Taichung Branch of the Taiwan High Court. As at the reporting date of the financial statements, the litigation is still in progress hence the result of the case is not confirmed and it is not possible to predict the exact amount of compensation that may be claimed or awarded.

6.11 Other Major Risks and countermeasures: None.

6.12 The risk management organization chart:

Important risk assessment item	Direct risk control unit (First mechanism)	Risk consideration and control (Second mechanism)	Board of director and audit room (Third mechanism)

(2) Employees' code of conduct or ethics of the Company

A. The Company has formulated the "Employee Work Manual", "Personnel Management. Regulations" and "Administrative Management Regulations" as the guidelines that Pontex's directors, supervisors, managers, and all employees should follow. When employees enter the factory, they sign a "LaborContract". The main contents are:

(1) All personnel behaviors should correspond with integrity and ethics, should truly abide by the company's various systems and regulations, and should not damage the company's interests or reputation due to personal interests.

(2) Employees shall maintain the confidentiality of confidential information, files, documents, and other related materials, charts, and reference documents known or held by the company.

(3) The periodic report submitted shall be disclosed in a complete, fair, correct, timely, and easy-to-understand manner.

(4) Treat customers and suppliers in a fair and mutually beneficial manner. (The company's business philosophy-professionalism, innovation, value, and sharing. The quality goals-satisfaction of customers, employees, and shareholders.)

(5) Protect the company's assets for effective use.

(6) Comply with various government laws and regulations.

(7) When there is a violation of this code of conduct or the possibility of violation, it should promptly report to the control unit and personnel listed in this code of conduct.

B. When the various personnel and administrative regulations are added or revised, the employees will be informed. Therefore, employees could clearly understand the various codes of conduct. If employees encounter deeds or behaviors that could be rewarded or warned, they will be rewarded or punished by the Company's "Reward and Punishment Management Measures". Or included in the evaluation points during the employee's semi-annual performance evaluation.

(3) Procedures for handling material inside information of the Company

The Company has established procedures for handling material inside information, signed a confidentiality agreement with all employees of the company and signed a statement to prevent insider trading with directors and supervisors, to avoid violations and insider trading.

The procedures for handling material inside information formulated by the Company are formulated in the "Procedures for Handling Material Inside. Information" in the administrative management regulation

(4) The working environment and protection measures for employees' safety of the Company

- A. The Company has obtained the ISO14001 Environmental management systems. The primary obligation is to construct a safe, comfortable, healthy, and hygienic working environment. To improve the working environment and personnel safety, the Company holds safety and health education training in machinery equipment and fire safety regularly. Furthermore, annual regular inspections and maintenance to ensure the relevant equipment is in a usable status. Additionally, a fire drill is carried out for all employees once half a year to ensure that all employees have received appropriate and necessary emergency response training and could perform their duties, to comprehensively prevent occupational disasters.

For the personal safety of all employees, for the access security part, the factory and the surroundings are equipped with a complete monitoring system, which is managed and maintained by a dedicated person. A security company is signed to control the personnel and vehicles entering and leaving the factory to keep the safety of the factory. The Company insured the group insurance for employees to provide necessary assistance timely when employees suffer from illness or occupational disasters, to increase the rights of employees at work.

- B. The Company regularly conducts employee health checks, sets up first aid personnel and first aid kits following the law, and conducts disinfection inside and outside of the factory from time to time to maintain the health of employees.
- C. For contractors, in addition to conducting safety training for contractors who enter the factory, the Company also inspects, manages, and supervises the construction site from time to time.
